ABOUT THE AUTHOR (CURRICULUM VITAE)

Lisanne Antonetta Elisabeth Maria van Houtum was born on the 13th of March 1991 in Veghel, the Netherlands. After graduating from secondary education (Gymnasium Bernrode, Heeswijk-Dinther) in 2009, Lisanne obtained her Bachelor's degree in Psychobiology (2012) and Master's degree in Neuroscience (2014) at the University of Amsterdam, being triggered by the versatility and complexity of psychological processes in the brain and their biological backgrounds. Before starting her PhD in 2017, she gained extensive research experience in various labs, with a main focus on functional neuroimaging and adolescent psychopathology (e.g., de Bascule, Amsterdam UMC under supervision of dr. Koen van Lith (2013); Image Sciences Institute, UMC Utrecht under supervision of dr. Paul Smeets (2014-2015); Social, Health, and Organizational Psychology, Utrecht University under supervision of Prof.dr. Monique Smeets (2016)).

In 2017 Lisanne started her five-year PhD project together with three other PhD candidates as part of a large NWO Vici project called RE-PAIR, at the Clinical Psychology Unit of Leiden University under supervision of Prof.dr. Bernet Elzinga, dr. Marieke Tollenaar, and dr. Geert-Jan Will. The RE-PAIR study uses a multi-method family approach to study the bidirectional interplay between parent-child interactions and adolescent depression. In her project, she focused on identifying (dysfunctional) neural mechanisms underlying social evaluations and self-views from a parent-adolescent perspective using ecologically valid functional MRI tasks, which may relate to (daily) parent-adolescent interactions as well as adolescent depression. During her PhD, Lisanne received training from the Dutch-Flemish postgraduate school for Experimental Psychopathology (EPP) and the Graduate School of Social and Behavioral Sciences of Leiden University. Furthermore, she trained and supervised multiple Clinical Psychology master students in writing their thesis and conducting clinical research. In 2022 Lisanne had the privilege to visit Prof.dr. Grenyer's lab at the University of Wollongong in Australia for three months, being funded by a KNAW Ter Meulen Grant for pediatric medicine. Next to learning a novel functional MRI technique, she was involved in a functional MRI study related to borderline personality disorder, and participated in clinical workshops to work with parents with complex mental health challenges.

Currently, Lisanne works as a postdoctoral researcher within Prof.dr. Neeltje van Haren's lab at the Child and Adolescent Psychiatry/Psychology Unit of Erasmus MC Sophia Children's hospital. She is involved in both the FAMILY consortium and PANDA-study, to investigate the risk for intergenerational transmission of psychopathology in high-risk offspring from a (perinatal) neurodevelopmental perspective.

ACKNOWLEDGEMENTS | DANKWOORD

Dit proefschrift was er niet gekomen zonder de substantiële bijdrage en steun van de mensen om mij heen, van wie ik een aantal in het bijzonder wil bedanken.

Mijn promotor, **Bernet**, dank voor de vele inzichten. Ik bewonder niet alleen jouw academische werkwijze, maar ook hoe jij bent als mens en anderen stimuleert, juist door hen vrij te laten. Iets wat mij inspireert.

Mijn copromotores, **Marieke**, jij stond altijd voor mij klaar. Ik wil jou ontzettend bedanken voor jouw fijne begeleiding, openheid en immense betrokkenheid. **Geert-Jan**, veel dank voor al jouw advies en kritische blik, alsook jouw gezelligheid.

Charlotte, ook al ben jij geen officiële copromotor, voor mij voelt dat wel zo. Dank voor alle input en betrokkenheid. In Australië hebben Milan, Olivia en ik het enorm naar ons zin gehad, mede dankzij jullie gastvrijheid. **Brin**, thank you for hosting me at University of Wollongong and for the wonderful collaboration.

De leden van de leescommissie, **Robert, Marie-Anne, Anna** en **Eddie**, bedankt voor de tijd die jullie hebben genomen voor het lezen en beoordelen van mijn proefschrift.

Lieve **Mirjam**, wederom kruisten onze paden, en ook hier traden wij op als dreamteam (nu ABBA nog). Ik waardeer jouw Noord-Hollandse directheid en nuchterheid enorm. Lieve **Loes**, wij vonden elkaar snel in de gezelligheid van het Zuiden. Van jou leerde ik de kunst van het nuanceren: binnen de psychologie is alles een stuk grijzer vergeleken met de zwart-witte biologie. Wat ben ik blij met jullie als (ex)collega's, paranimfen, en als vriendinnen! Veel dank voor jullie support en alle leuke momenten samen, waarvan er nog vele zullen volgen.

Het verdere **RE-PAIR team**, bedankt voor de fijne samenwerking. **Wilma**, heel fijn dat jij 'de meiden' bent komen versterken met jouw kennis en kunde. Wat ben jij een leuk, onbevangen mens. **Bart**, bedankt voor jouw betrokkenheid en gezelligheid. Alle onderzoeksassistenten en scriptiestudenten: dank voor jullie hulp bij de dataverzameling, gepaard gaande met ongekend enthousiasme. Zo vlogen de onderzoeksdagen voorbij!

Grote dank aan alle **RE-PAIR deelnemers**, jullie inzet is van ongekende waarde! Meedoen als gezin aan onderzoek en informatie delen over thema's als ouderschap, psychopathologie en trauma laat een maatschappelijke betrokkenheid zien, die ik zeer bewonder.

Neeltje, veel dank voor de kans om te starten als postdoc bij het Erasmus MC, terwijl mijn proefschrift nog (net) niet af was. Ik geniet van onze samenwerking en kijk uit naar de komende tijd!

Alle (voormalige) **KP-collega's** en **medepromovendi**, bedankt voor alle warmte en gezelligheid, waardoor ik me snel thuis voelde en lunchpauzes nooit saai waren. In het bijzonder mijn 2B36-collega's: **Marie-Louise**, dank voor jouw scherpe inzichten en humor, zoals het een echte sfeermaker betaamt. **Mona**, thank you for sharing your wonderful stories and broadening my view. **Cosima**, jij hebt voldoende koffie gehaald om te classificeren als 2B36-meubilair, dank voor al jouw gezelligheid!

Lieve **Michelle** en **Gidion**, dank voor onze fijne studietijd in Amsterdam. Ik kijk vol genot terug op onze urenlange café de Roeter-sessies. Naast dat mijn interesse voor de academie hier opbloeide, leerde ik hier ook het onderscheid tussen Brabants en ABN. Blij met jullie!

Lieve meiden: **Eva**, **Steffie**, **Lieke**, **Bram**, **Emma**, **Marloes**, **Elise**, **Michelle**, **Vivienne**, **Annebel** en **Eva**, ik kan me geen betere vriendinnen wensen. Heel veel dank voor jullie onvoorwaardelijke steun en alle vreugde en ellende (en vino) die we delen in het leven. Zeker dit jaar, het kettinkje met mama's en mijn geboortesteen doe ik niet meer af.

Lieve (**schoon**)familie, dank voor alle steun en interesse. In het bijzonder **Thé** en **Toos**, jullie betekenen heel veel voor mij. **Anthony**, ik weet dat ik jou altijd kan bellen. **Jan**, **Mone**, **Timo** en **Moos**, jullie geven mij het gevoel echt onderdeel te zijn van de familie, waarvoor ik heel dankbaar ben. Jan, ongekende dank voor het omslagontwerp!

Lieve **Richard**, **Susanne**, **Jim** en **Sem**, wat ben ik blij met jullie als broer, schoonzus en neefjes. Jullie vervullen een belangrijke rol in mijn leven, en ik weet dat ik altijd bij jullie terecht kan (wat straks next-door is, dus pas maar op).

Lieve **papa** en **mama**, bedankt voor alles. Interesse tonen en mij onvoorwaardelijk steunen is jullie niet vreemd. Papa, van jou leer ik dat kritisch zijn als ouder zeker mag, zolang je ook complimenteert. Mama, jij liet mij altijd mijn eigen keuzes maken, met gepaste afstand. Dat dit grote voorspellers zijn voor een fijne ouder-kind band en een gelukkig bestaan, wist ik allang. Ook weet ik hoe jullie vol trots naar mijn verdediging uitkeken. Nu moet het zonder jou, lieve mama, ik mis je.

Lieve **Milan** en **Olivia**, ik zou niet weten wat ik zonder jullie zou moeten. Milan, jij kan alles: van warmte geven tot kritisch nadenken, van inspireren tot relativeren, van statistische vraagstukken beantwoorden tot de omslag mede-ontwerpen, van mijn ultieme geliefde tot de liefste papa zijn. Olivia, jij maakt elke dag zonnig. Ik hou van jullie.
