Bioengineering and Biophysics of Viral Hemorrhagic Fever

Proefschrift

ter verkrijging van

de graad van doctor aan de Universiteit Leiden,

op gezag van rector magnificus prof.dr.ir. H. Bijl,

volgens besluit van het college voor promoties

te verdedigen op dinsdag 19 september 2023

klokke 15:00 uur

door

Huaqi Tang

geboren te Chifeng, China

in 1992

Promotor:

Prof. dr. H. Irth

Co-promotor:

Dr. A. Mashaghi Tabari

Promotiecommissie:

Prof. dr. M. van Eck

Prof. dr. J. A. Bouwstra

Prof. dr. N. Ritz (University Children's Hospital Basel)

Prof. dr. R. Heeren (Maastricht University)

Prof. dr. T. Ottenhoff (Leiden University Medical Centre)

Dr. I. Noshadi (University of California, Riverside)

The research described in this thesis was performed at Medical Systems Biophysics and Bioengineering group of the Leiden Academic Centre for Drug Research (LACDR), Leiden University (Leiden, The Netherlands).

Huaqi Tang was financially supported by the CSC Scholarship offered by the China Scholarship Council.

Contents

Chapter 1	General introduction	1
Chapter 2	Human organs-on-chips for virology	15
Chapter 3	Ebola hemorrhagic shock syndrome-on-a-chip	49
Chapter 4	Lassa hemorrhagic shock syndrome-on-a-chip	83
Chapter 5	Organ chip and single cell lab-on-a-chip analysis of Dengue nonstructural protein-1 regulation of human endothelial cell mechanics	99
Chapter 6	Ebola virus-like particles reprogram cellular metabolism	119
Chapter 7	Random forest and live single-cell metabolomics reveal metabolic profiles of human macrophages upon polarization	171
Chapter 8	Conclusions and outlook	201
Chapter 9	Addendum	211
	Summary	
	Summary (in Dutch)	
	Acknowledgements	
	Curriculum vitae	
	List of publications
