**ELECTRICAL AND MAGNETIC PROPERTIES OF
FERRITIN: ELECTRON TRANSPORT PHENOMENA
AND ELECTRON PARAMAGNETIC RESONANCE**

**ELECTRICAL AND MAGNETIC PROPERTIES OF
FERRITIN: ELECTRON TRANSPORT PHENOMENA
AND ELECTRON PARAMAGNETIC RESONANCE**

Proefschrift

ter verkrijging van
de graad van doctor aan de Universiteit Leiden,
op gezag van rector magnificus prof. dr. ir. H. Bijl,
volgens besluit van het college voor promoties
te verdedigen op dinsdag 26 september 2023
klokke 12:30 uur

door

Jacqueline Andrea LABRA MUÑOZ

geboren te Santiago, Chile
in 1992

Promotores:

Dr. M. I. Huber

Prof. dr. ir. H. S. J. van der Zant (Technische Universiteit Delft)

Promotiecommissie:

Prof. dr. J. Aarts

Prof. dr. M. Fittipaldi (Università degli Studi di Firenze)

Prof. dr. C. A. Nijhuis (Universiteit Twente)

Prof. dr. E. J. J. Groenen

Prof. dr. ir. S. J. van der Molen

Prof. dr. J. M. van Ruitenbeek

*In loving memory of my father.
Con amor, en memoria de mi padre.*

CONTENTS

Summary	xiii
Samenvatting	xv
1 Introduction	1
1.1 Protein-based bioelectronics and magnetism	2
1.2 Ferritin: a promising candidate	2
1.3 Bridging the single-particle and multi-particle-ensemble descriptions of ferritin	3
1.4 Dissertation outline	5
References	6
2 Implementation of a local gate in wide self-aligned nanogap devices	11
2.1 Introduction	12
2.2 Materials and Methods	13
2.2.1 Chip design and device fabrication	13
2.3 Results and discussion	15
2.3.1 Device characterization	15
2.3.2 Room temperature: NP trapping	17
2.3.3 Low temperatures: <i>IV</i> characteristics	18
2.3.4 Low temperatures: Gating	19
2.4 Conclusions.	22
2.5 Appendix	23
2.5.1 Current-voltage characteristics at room T	23
2.5.2 Silicon back gate	23

References	25
3 Ferritin single-electron devices	27
3.1 Introduction	28
3.2 Materials and Methods	29
3.2.1 Ferritin characterization	29
3.2.2 Device fabrication	29
3.2.3 Ferritin trapping	30
3.3 Results	30
3.4 Capacitance and resistance estimations	34
3.4.1 Capacitance estimates	34
3.4.2 Resistance estimates	36
3.5 Discussions	38
3.6 Appendix	39
3.6.1 Ferritin purity assessment	39
3.6.2 <i>IV</i> types (low temperature).	40
3.6.3 Reference measurements	40
3.6.4 CB experimental data and fits	41
3.6.5 Charge offset variations	42
3.6.6 Room temperature measurements.	43
References	44
4 A ferritin single-electron transistor	47
4.1 Introduction	48
4.2 Materials and Methods	50
4.2.1 Ferritin sample.	50
4.2.2 Devices	50
4.2.3 Ferritin trapping	51
4.3 Results and discussion	52
4.3.1 Closing Coulomb diamonds	53
4.3.2 Non-closing CB diamonds	56

4.3.3	Comparison of C and R with respect to previous reported values . . .	58
4.4	Discussion	59
4.4.1	Capacitance estimates	61
4.5	Conclusions.	63
4.6	Appendix	64
4.6.1	Coulomb blockade experimental data and fits	64
4.6.2	Extra three-terminal measurements	66
	References	67
5	EPR characterization of human-liver ferritin	71
5.1	Abstract	72
5.2	Introduction	72
5.3	Materials and methods	75
5.3.1	Properties and characterization of the human-liver ferritin	75
5.3.2	Magnetometry	76
5.3.3	Electron Paramagnetic Resonance	76
5.3.4	Theoretical background of Magnetometry analysis	77
5.3.5	Magnetic phases proposed for ferritin in the literature.	77
5.3.6	The magnetic signature of idealized spin structures	78
5.3.7	The role of distributed parameters	84
5.3.8	Surface-spin model for ferritin	86
5.4	Results	88
5.4.1	Electron Paramagnetic Resonance	88
5.4.2	DC susceptibility and hysteresis	91
5.4.3	AC susceptibility	93
5.4.4	Equilibrium magnetization	93
5.4.5	Coercivity distributions	97
5.5	Discussion	101
5.5.1	EPR simulations	102
5.5.2	Ferritin properties derived from magnetometry	104
5.5.3	Comparison between EPR and magnetometry	108

5.6	Conclusions	112
5.7	Appendix	113
5.7.1	TEM description	113
5.7.2	Ferritin purity assessment	113
5.7.3	EPR baseline correction	115
5.7.4	EPR simulation with one component	116
5.7.5	EPR simulations, from 20 K to 210 K	117
5.7.6	EPR simulations of individual components	118
5.7.7	EPR simulations parameters	119
5.7.8	EPR simulations with different scaling factors	120
5.7.9	EPR S-D inverse compensation	121
5.7.10	Sensitivity of EPR parameters	122
5.7.11	Ferritin core and mononuclear Fe(III) EPR intensities	123
5.7.12	EPR Model Simulations	125
5.7.13	EPR alternative fitting approach	126
5.7.14	Equilibrium magnetization models	127
