## TABLE OF CONTENTS

Chapter 1	General introduction, aim and outline of the thesis	8
Chapter 2	Adjunctive treatment with oral dexamethasone in non-ICU patients hospitalised with community-acquired pneumonia: A randomised clinical trial	20
Chapter 3	Neutrophil count, lymphocyte count and neutrophil-to-lymphocyte ratio in relation to response to adjunctive dexamethasone treatment in community-acquired pneumonia	46
Chapter 4	Community-acquired pneumonia subgroups and differential response to corticosteroids: a secondary analysis of controlled studies	70
Chapter 5	Latent class analysis-based subgroups and response to corticosteroids in hospitalised community-acquired pneumonia patients: a validation study	102
Chapter 6	Overweight and obesity are not associated with worse clinical outcomes in COVID-19 patients treated with fixed-dose 6 mg dexamethasone	110
Chapter 7	The extent of microbiological testing is associated with alteration of antibiotic therapy in adults with community-acquired pneumonia	126
Chapter 8	Summary, discussion and future perspectives	144
	Nederlandse samenvatting	162
	Dankwoord	170
	Curriculum vitae	173
	List of publications	175
