Sources until 1850	139
Modern literature	140
Conclusions.....	144
Bibliography	148
Annex 1 Letter to Raoux.....	158
Annex 2 Selective List of Punto's Published Works	161
Curriculum Vitae	163

Acknowledgements

Many befriended colleagues and collegiate friends from all over the world have guided my thinking and artistic development. It is impossible to name everyone, and I ask forgiveness in advance from the people I forget.

First, I would like to thank my supervisors from Leiden University, Dinko Fabris, Ton Koopman and Frans de Ruiter, for their support.

A huge thank you to Alexander Melnikov, with whom I spent intense and happy days at the Teldex studio in Berlin, together with the great *Tonmeister* Martin Sauer.

Thanks to a generous donation from the Charles Burney Fund, I was able to pay for the transportation and tuning of Melnikov's three pianos and for the costs of the studio.

It is a great privilege to work with young natural horn talents from all over the world in my classes at the conservatories of The Hague and Amsterdam. The drive and musical intelligence of all my (ex-)students is a constant source of pleasure and encouragement. Together we are the ambassadors of the natural horn.

I thank Pierre-Antoine Tremblay, one of my most successful former students, for his friendship and inspiration, for translating Punto's letter, and for proofreading this thesis.

I consider the *Orchestra of the Eighteenth Century* to be my musical roots. Thanks to all colleagues of this musical family, I learned that a warm and friendly atmosphere goes very well together with top-level performances. I especially thank Donna Agrell for pointing out the path of artistic research and for supporting me all these years. Eternal thanks to the late Frans Brüggen for his visionary artistic leadership, and to the legendary director Sieuwert Verster for his unwavering enthusiasm, friendship, and trust.

A dear colleague from the very beginning of my career is Claude Maury. From him I learned how beautiful it is to delve into the history of our instrument, the horn. Merci, Claude.

For years I hung out with my horn buddy Erwin Wieringa. He was the first to show me that it is possible to spontaneously improvise on the unruly natural horn.

Stefan Blonk, another long-term horn comrade in the *Orchestra of the Eighteenth Century*, I thank for sharing his knowledge about horns and mouthpieces.

My appreciation and thanks go to the staff of the Orpheus Institute in Ghent, and their docARTES program, that introduced me to the world of artistic research.

I am grateful for the invaluable support of the staff at the Academy of Creative and Performing Arts at Leiden University.

I would like to thank the Conservatorium van Amsterdam for granting the indispensable Research Voucher. Michiel Schuijjer was always a great support and taught me the basics of research.

I owe many thanks to the Royal Conservatoire The Hague, my home institution, notably former principal Henk van der Meulen, and vice-principal Martin Prchal, for the encouragement and the space I was given to complete this thesis. A lot of thanks also to Brigitte Rebel, my closest colleague, for all the cheerfulness in our office, even in the busiest times.

I would like to thank Bert Mooiman for his advice regarding musical analysis.

Warner ten Kate, a rare combination of a scientist and a professional horn player, has rendered me invaluable services by guiding me through the mystical mathematics of horn multiphonics. In addition, I thank him for his generous advice while writing my dissertation.

Without the help of Graham Nicholson, I would never have been able to build the necessary mouthpieces.

Thomas Hiebert, one of the pillars of period horn research, generously shared his discovery of multiphonics in a manuscript by horn player Mayr and his thoughts on it.

I am grateful for the engravings that Kathryn Zevenbergen made and look back with enormous pleasure on our wonderful discussions.

The great connoisseur of 18th century Bohemian musical life, Václav Kapsa, was kind enough to share with me his knowledge of Bohemian serfdom and point me to some important resources.

Warmest thanks to my former spouse Tinkie Simmer for believing in me before anyone else did, and for putting up with my horn madness for such a long time.

I thank our wonderful son Youri van der Zwart for his loving support and encouragement, and for his keen insight into my personality.

My greatest gratitude goes out to my beloved, Ilse Verkaaik, who is my romantic rock. Her bright, critical mind and amazing ability to ask questions sometimes drive me to joyful despair and helped me formulate this thesis.

Ik prijs mij gelukkig dat mijn ouders mijn promotie nog mee kunnen maken. Niet alleen hebben ze mij altijd veel liefde gegeven, zij geven mij ook het mooiste voorbeeld door tot op zeer hoge leeftijd kalm mee te bewegen met de tijd, en zonder zichzelf te verliezen het leven door zich heen te laten stromen.
