Cover: a mirrored statue of David by Gian Lorenzo Bernini breaking from a frame representing an autoreactive B cell breaching immunological tolerance while attacking healthy cells illustrated in the back cover.

The research described in this thesis was performed at the Department of Rheumatology of the Leiden University Medical Center in Leiden, the Netherlands. The research was financially supported by the Netherlands Organization for Scientific Research (NWO)'s Gravitation program 2013 granted to the Institute for Chemical Immunology (ICI; grant 024.002.009), project "Trojan horses for antigen-specific B cell targeting in RA" (ICI00019).
