Discovery and characterization of new glucosylated metabolites: pathophysiological consequences

Proefschrift

ter verkrijging van
de graad van doctor aan de Universiteit Leiden,
op gezag van de rector magnificus prof. dr. ir. H. Bijl,
volgens besluit van het college voor promoties
te verdedigen op donderdag 2 november 2023
klokke 11.15 uur

door

Hubrina Neeltje Jacomina Meijer
geboren te Goes
in 1990

Promotor:

Prof. dr. J.M.F.G. Aerts

Co-promotor:

dr. R.G. Boot

Promotiecommissie:

Prof. dr. H.S. Overkleeft

Prof. dr. M. van der Stelt

Prof. dr. R.T. Dame

Prof. dr. T. Hankemeier

Prof. dr. C.J.M. de Vries, Universiteit van Amsterdam

Prof. dr. R.H.L. Houtkoper, AMC – Universiteit van Amsterdam

*"Develop a passion for learning.
If you do, you will never cease to grow."*

Anthony J. D'Angelo

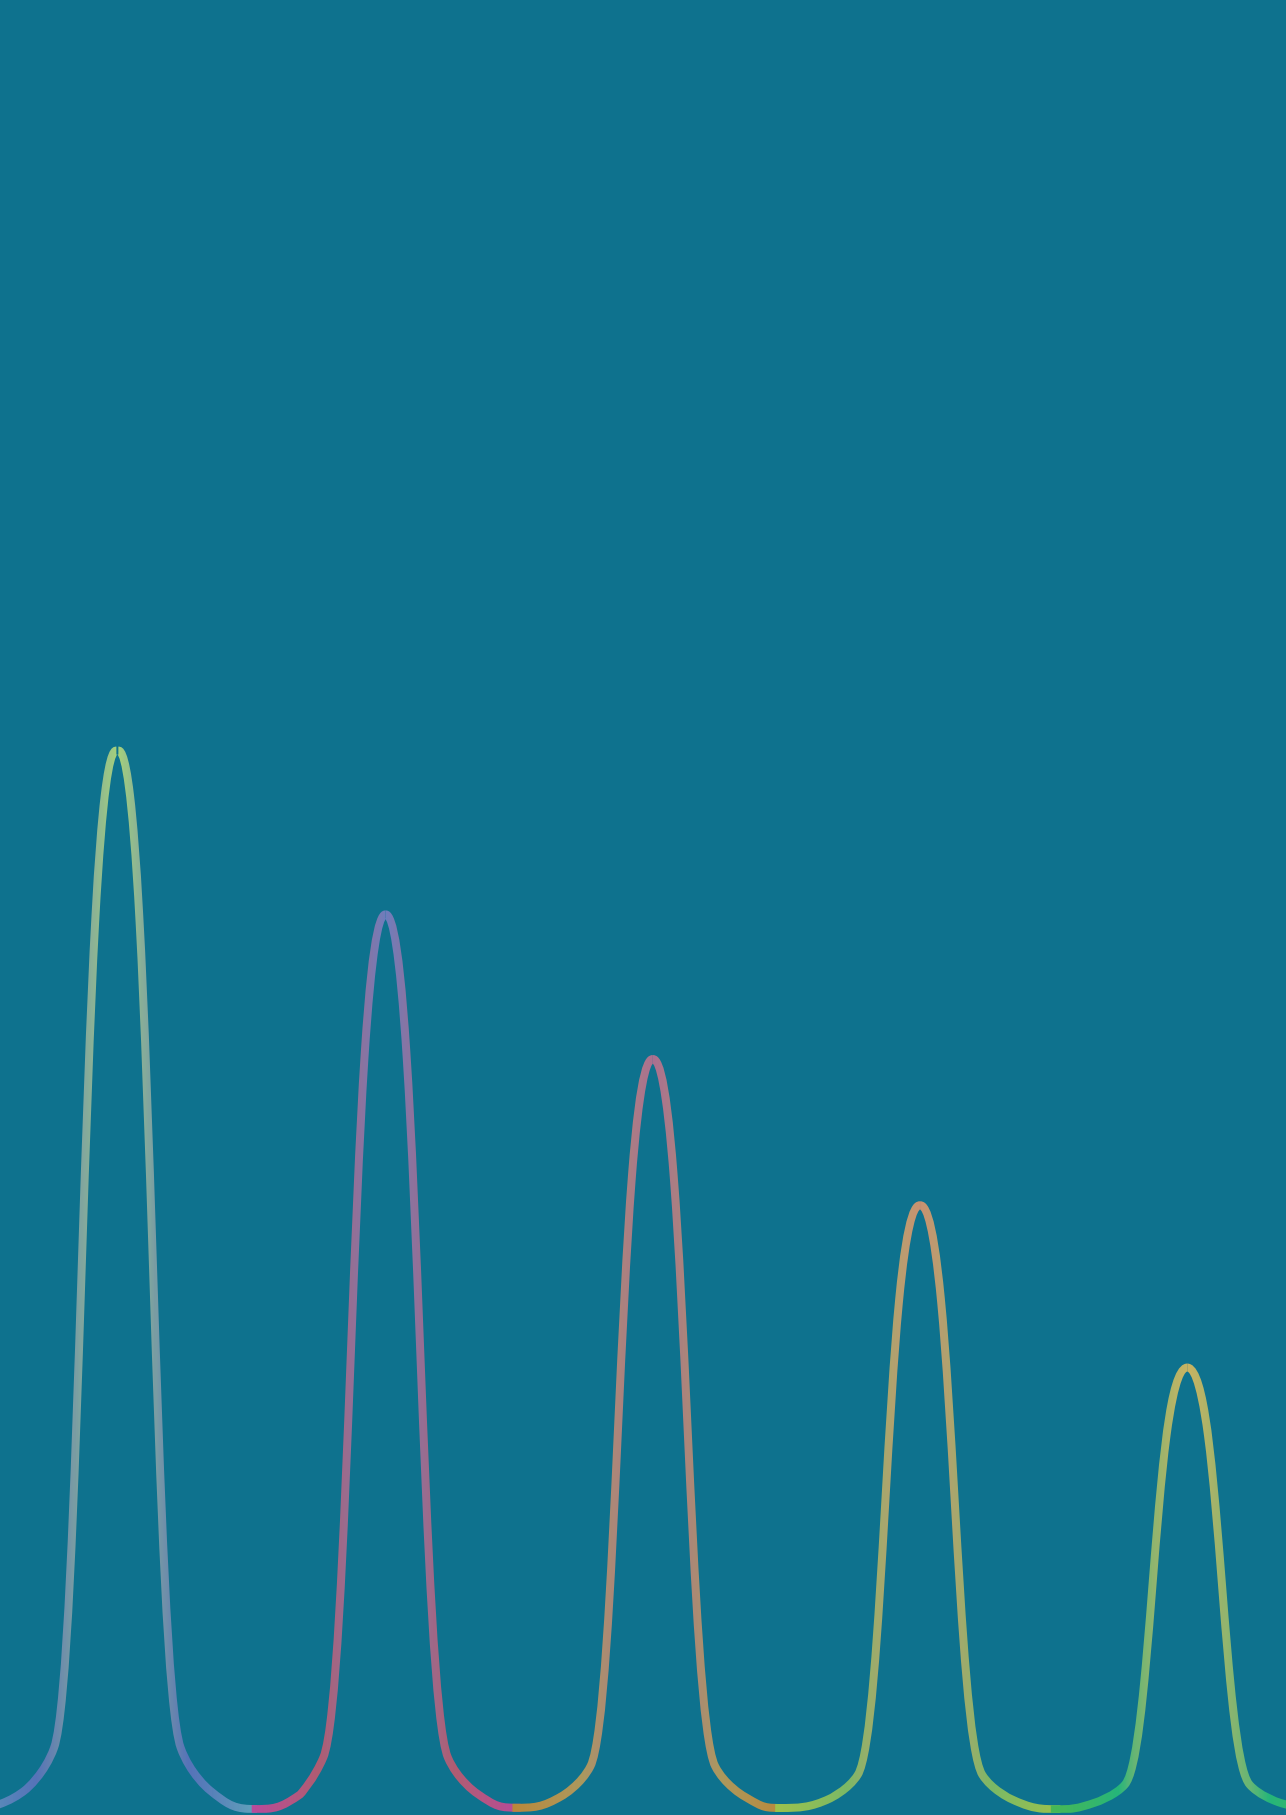

Table of Contents

Chapter 1 - Introduction and outline	13
Lysosomes and lysosomal diseases	14
GBA: catalytic features	19
GBA2 and GBA3	22
Physiological relevance of transglycosylation	23
Acceptors in transglucosylation	23
Goals of the thesis	26
Other published contributions to the research field	27
References	28
Chapter 2 - Mass spectrometric quantification of glycosylated metabolites of cholesterol analogues using (isotope) standards	35
Abstract	37
Introduction	38
Results	40
<i>Quantification of Glc7DHC, GlcD₃ and GlcDesm by LC-MS/MS</i>	40
<i>Mass spectrometric analysis, fragmentation and elution spectrum</i>	41
<i>Intra/Inter assay variation</i>	43
<i>Carryover</i>	45
<i>Storage of samples</i>	45
<i>Impurities</i>	49
<i>Detection of glycosylated sterols in biological samples</i>	49
Discussion	52
Experimental procedures	53
<i>Materials</i>	53
<i>Methods</i>	54
Supplementary information	60
References	62

Chapter 3 - Formation and degradation of glucosyl-desmosterol	65
Abstract	67
Introduction	68
Results	71
<i>In vitro formation and degradation of GlcDesm by transglucosylation by β-glucosidases</i>	71
<i>Measurement of GlcChol and GlcDesm in GD spleen</i>	75
Discussion	76
Acknowledgements	77
Supplementary information	78
Experimental procedures	79
<i>Materials</i>	79
<i>Methods</i>	79
References	81
 Chapter 4 - Formation, degradation and natural occurrence of Glucosyl-7-dehydrocholesterol and Glucosylated vitamin D₃	 87
Abstract	89
Introduction	90
Results	93
<i>In vitro formation and degradation of Glc7DHC by transglucosylation by β-glucosidases</i>	93
<i>Conversion of Glc7DHC into GlcD₃</i>	97
<i>In vitro formation and degradation of GlcD₃ by transglucosylation by β-glucosidases</i>	97
<i>Measurement of GlcChol, Glc7DHC and GlcD₃ in GD spleen</i>	100
<i>Measurement of GlcChol, Glc7DHC and GlcD₃ in skin</i>	101
Discussion	102
Supplementary information	104
Experimental procedures	106
<i>Materials</i>	106
<i>Methods</i>	107
References	110

Chapter 5 - Potential role of GBA3 in formation and degradation of glycosylated metabolites	117
Abstract	119
Introduction	120
Results	121
<i>Formation and degradation of glycosylated metabolites by GBA3</i>	121
Discussion	123
Acknowledgements	123
Experimental procedures	125
<i>Materials</i>	125
<i>Methods</i>	125
References	127
 Chapter 6 - General discussion and perspectives for future research	 131
General discussion	132
Perspectives for future research	133
<i>New metabolites to be explored</i>	133
<i>Glucosylated metabolites: the missing link?</i>	135
<i>Potential acceptor abnormality that might promote causing glucosylated metabolites abnormalities</i>	137
<i>Untargeted discovery of glycosylated metabolites</i>	138
<i>Formation and occurrence of Xylosylated metabolites</i>	140
Conclusion	141
References	142
 Summary	 150
Samenvatting	153
 About the author - Curriculum Vitae	 156
 List of publications	 158

Addendum	159
Addendum I: Glucosylated cholesterol in mammalian cells and tissues: formation and degradation by multiple cellular β -glucosidases	159
Addendum II: Human glucocerebrosidase mediates formation of xylosyl-cholesterol by β -xylosidase and transxylosidase reactions	160
Acknowledgement	161
