Disentangling drought-responsive traits with focus on Arabidopsis

Ajaree Thonglim. 2023. *Disentangling drought-responsive traits with focus on Arabidopsis.*

PhD Thesis at the University of Leiden, The Netherlands.

ISBN: 978-94-6483-426-0

This PhD research was financially supported by:

Institute for the Promotion of Teaching Science and Technology.
Dutch Research Council NWO (grant ALWOP.488).

This PhD research was carried out at:

Naturalis Biodiversity Center, The Netherlands.
Leiden University, The Netherlands.
University of Bordeaux, France.

Editorial layout and cover design:

Ajaree Thonglim

Disentangling drought-responsive traits with focus on Arabidopsis

Proefschrift

ter verkrijging van
de graad van doctor aan de Universiteit Leiden,
op gezag van rector magnificus prof.dr.ir. H. Bijl,
volgens besluit van het college voor promoties
te verdedigen op donderdag 9 november 2023
klokke 11:15 uur

door

Ajaree Thonglim
geboren te Nakhon Pathom, Thailand
in 1993

Promotor:
Prof. Dr. E. Smets

Co-promotor:
Dr. F. Lens

Promotiecommissie:
Prof. Dr. A.H. Meijer
Prof. Dr. P. van Welzen
Dr. S. Balazadeh
Prof. Dr.ir. K. Steppe (Ghent University, Belgium)
Prof. Dr. S. Jansen (Ulm University, Germany)

TABLE OF CONTENTS

CHAPTER 1 7

General introduction and thesis outline

CHAPTER 2 43

Intervessel pit membrane thickness best explains variation in embolism resistance amongst stems of *Arabidopsis thaliana* accessions

CHAPTER 3 79

Drought response in Arabidopsis displays synergistic coordination between stems and leaves

CHAPTER 4 125

High leaf water potential: a key to drought resilience in *JUB1* overexpression lines of Arabidopsis and tomato

CHAPTER 5 159

General discussion and future perspectives
