The work presented in this thesis was carried out at the Institute of Biology Leiden, Leiden University, and supported by the China Scholarship Council (CSC 201908110363).

Cover design: The layout and macroscopy pictures are completed by Jie Yin. The sketch comes from "Guernica" copied by Zihao Hu.

Printing: IPSKAMP Printing B.V

Harnessing zebrafish xenograft models for ocular melanoma treatment discovery

Proefschrift

ter verkrijging van
de graad van doctor aan de Universiteit Leiden,
op gezag van rector magnificus prof.dr.ir. H. Bijl,
volgens besluit van het college voor promoties
te verdedigen op dinsdag 5 december 2023
klokke 11:15 uur

door

Jie Yin

Geboren te Shanxi, China

in 1993

Promotores

Prof. dr. B.E. Snaar-Jagalska

Prof. dr. M.J. Jager

Co-promotor

Dr. M. Wang

Promotiecommissie

Prof. dr. A.H. Meijer

Prof. dr. H. Spaink

Prof. dr. P. ten Dijke (Leiden University Medical Center)

Prof. dr. F.A. Ossendorp (Leiden University Medical Center)

Contents

Chapter 1	General Introduction	7
Chapter 2	Ortho- and ectopic zebrafish xeno-engraftment of ocular melanoma to recapitulate primary tumor and experimental metastasis development	45
Chapter 3	Lactate secreted by glycolytic conjunctival melanoma cells attracts and polarizes macrophages to drive angiogenesis in zebrafish xenografts	69
Chapter 4	Zebrafish Patient-derived xenograft model as a preclinical platform for uveal melanoma drug discovery	101
Chapter 5	The antitumoral effect of glycosylated PPD-ginsenosides on conjunctival melanoma relies on the Glucosylceramidase beta 2 (GBA2) activity from the cancer microenvironment	129
Chapter 6	General Discussion and Summary	161
Appendices	Nederlandse Samenvatting	172
	Acknowledgements	174
	Curriculum vitae	178
	List of publications	179
