in 1991

Promotor:

Prof. dr. E.J. Kuijper

Co-promotor:

Dr. M.F. Contarino

Leden promotiecommissie:

Prof. dr. M. Roestenberg

Prof. dr. J.J. van Hilten

Prof. dr. M. Nieuwdorp (Amsterdam University Medical Centres)

Dr. S.D. Goldenberg (Guy's and St Thomas' NHS Foundation Trust and King's College, London)

The printing of this thesis was financially supported by the Medical Microbiology department of the Leiden University Medical Center and the University of Leiden.

Table of contents

Chapter 1	Introduction and thesis outline	9
	<i>Clostridioides difficile</i> infections and the role of the gut microbiota	11
	Multidrug-resistant bacteria and the role of the gut microbiota	20
	Parkinson's disease and the role of the gut microbiota.	35
	Outline of this thesis	41
Part 1	The epidemiology of infections with <i>Clostridioides difficile</i> and multidrug-resistant bacteria	
Chapter 2	Comparison of trends in <i>Clostridioides difficile</i> infections in hospitalised patients during the first and second wave of the COVID-19 pandemic: A retrospective sentinel surveillance study	67
Chapter 3	An unusual outbreak in the Netherlands: community-onset impetigo caused by a meticillin-resistant <i>Staphylococcus aureus</i> with additional resistance to fusidic acid, June 2018 to January 2020	89
Chapter 4	A prospective matched case-control study on the genomic epidemiology of colistin-resistant Enterobacterales from Dutch patients	109
Part 2	Infectious adverse events of faecal microbiota transplantation	
Chapter 5	Periodic screening of donor faeces with a quarantine period to prevent transmission of multidrug-resistant organisms during faecal microbiota transplantation: a retrospective cohort study	143
Chapter 6	Transmission of antibiotic-susceptible <i>Escherichia coli</i> causing urinary tract infections in a fecal microbiota transplantation recipient: consequences for donor screening?	167
Part 3	Exploring faecal microbiota transplantation as treatment for various neurological disorders	
Chapter 7	Faecal microbiota transplantation in neurological disorders	183

Chapter 8	Safety and feasibility of faecal microbiota transplantation for Parkinson's disease patients: a protocol for a self-controlled interventional donor-FMT pilot study	249
Chapter 9	Summary	271
Chapter 10	General discussion	281
Chapter 11	Recommendations for the future	301
Chapter 12	Nederlandse samenvatting	311
	List of publications	323
	Curriculum vitae	325
	Dankwoord	326
