Contents

1	INTRODUCTION	15
1.1	Magnetism and the rise of modern physics	16
1.2	Magnetism throughout the Universe	18
1.3	Origin of magnetism	26
1.4	Astronomical observations of magnetic phenomena	31
1.5	The LOFAR	31
1.6	Astronomical interferometry of electromagnetic waves: the van Cittert–Zernike theorem	34
1.7	The ionosphere	46
1.8	Late-time radio probes of cosmological magnetism	49
1.9	This thesis	61
1.10	Future directions	66
2	A PROBABILISTIC APPROACH TO DIRECTION-DEPENDENT CALIBRATION	67
2.1	Introduction	68
2.2	Ionospheric effects on interferometric visibilities	70
2.3	Probabilistic relation between FED and Δ TEC: Gaussian process layer model	72
2.4	Method	76
2.5	Results	83
2.6	Discussion	86
2.7	Conclusion	91
	Appendix 2.A1 Derivation of tomographic equivalence	93
	Appendix 2.A2 Δ TEC variance function	94

	Appendix 2.A3	Covariance function with frozen flow	97
	Appendix 2.A4	Supporting figures	98
3	<i>FILAMENTARY BARYONS AND WHERE TO FIND THEM: A FORECAST OF SYNCHROTRON RADIATION FROM MERGER AND ACCRETION SHOCKS IN THE LOCAL COSMIC WEB</i>		101
	3.1	Introduction	103
	3.2	Methods	109
	3.3	Redshift predictions from geometric cosmic web model	121
	3.4	Results	130
	3.5	Discussion	140
	3.6	Conclusions	147
	Appendix 3.A1	Additional figures	148
	Appendix 3.A2	Single-shock synchrotron MEC–total matter density scaling relation	149
	Appendix 3.A3	Ray tracing in the cosmological setting	156
	Appendix 3.A4	Observer’s specific intensity	156
	Appendix 3.A5	Volume-filling fractions	158
	Appendix 3.A6	Notation	160
4	THE DISCOVERY OF A RADIO GALAXY OF AT LEAST 5 Mpc		163
	4.1	Introduction	165
	4.2	Data and methods	168
	4.3	Results and discussion	169
	4.4	Conclusion	187
	Appendix 4.A1	J1420-0545 comparison	189
	Appendix 4.A2	Inclination angle comparison	190
	Appendix 4.A3	Lobe volumes with truncated double cone model	193
5	AN INTERGALACTIC MEDIUM TEMPERATURE FROM A GIANT RADIO GALAXY		203
	5.1	Introduction	204
	5.2	Data	205
	5.3	Methods and results	214
	5.4	Discussion	228
	5.5	Conclusion	234
	Appendix 5.A1	Average density ratio for WHIM with isothermal β -profile	237
	Appendix 5.A2	Large-to-small-scale density conversion: the low-density regime	238
	Appendix 5.A3	Lower WHIM temperature constraints from current-day radio data	241

6	MEASURING THE GIANT RADIO GALAXY LENGTH DISTRIBUTION WITH THE LoTSS	243
6.1	Introduction	245
6.2	Theory	247
6.3	Sample compilation and properties	268
6.4	Results	281
6.5	Discussion	296
6.6	Conclusions	302
	Appendix 6.A1 Framework derivations and details	307
	Appendix 6.A2 Additional images	334
	Appendix 6.A3 Stellar and supermassive black hole masses	334
	Appendix 6.A4 Surface brightness prior	334
	Appendix 6.A5 Likelihood function	339
	Appendix 6.A6 Properties of newly discovered giants	341
7	DO LUMINOUS GIANTS POPULATE SPECIAL LARGE-SCALE ENVIRONMENTS? OR: THE RADIO LUMINOSITY–COSMIC WEB DENSITY RELATION FOR RADIO GALAXIES	343
7.1	Introduction	345
7.2	Data	349
7.3	Methods	352
7.4	Results	357
7.5	Discussion	379
7.6	Conclusion	391
	Appendix 7.A1 Cosmic Web localisation accuracy with spectroscopic and photometric redshifts	394
	Appendix 7.A2 Cosmic Web density distribution: the gamma Ansatz	395
	Appendix 7.A3 Modelling relative baryon density measurement heteroskedasticity	397
	Appendix 7.A4 Radio luminosity–Cosmic Web density relation: fixed voxel method	398
	Appendix 7.A5 Relative number density derivation	398
	Appendix 7.A6 Disparity between mean squared density and squared mean density	402
8	CONSTRAINING THE GIANT RADIO GALAXY POPULATION WITH MACHINE LEARNING–ACCELERATED DETECTION AND BAYESIAN INFERENCE	405
8.1	Introduction	407
8.2	Theory	408
8.3	Data	419

8.4	Methods	420
8.5	Results	439
8.6	Discussion	445
8.7	Conclusions	448
Appendix 8.A1	Curved power law PDF for L	451
Appendix 8.A2	Likelihood trick	452
Appendix 8.A3	PyBDSF parameters	453
Appendix 8.A4	Adaptations of the radio ridgeline based host galaxy identification	453
Appendix 8.A5	Sky coverages	455
APPENDIX A GAUSSIAN RANDOM FIELD IONOSPHERE MODEL EXTENSION: THE CURVED EARTH		457
APPENDIX B FLUX SCALE—INDUCED SPECTRAL INDEX UNCERTAINTIES FOR HIGH-SNR SOURCES		463
B.1	Introduction	464
B.2	Analytical results	464
B.3	Numerical results	468
B.4	Conclusion	468
9	POPULAIRWETENSCHAPPELIJKE SAMENVATTING	471
9.1	Licht en elektromagnetische golven	471
9.2	Radiogolven	472
9.3	Het Kosmische Web	474
9.4	Schokgolven in het Kosmische Web en ionosferische kalibratie	476
9.5	Schokgolfvoorspellingen voor het Kosmische Web aan de noordelijke hemel	478
9.6	Gevoelige LOFAR-beelden en een onverwachtse ontdekking	480
9.7	Een gigantisch uitvloeisel uit een spiraalsterrenstelsel	482
9.8	Een census van giganten	483
9.9	De omgevingen van gigantische galactische uitvloeisels in het Kosmische Web	485
9.10	Giganten, machinaal leren en magnetogenese	488
10	LIST OF PUBLICATIONS	489
11	CURRICULUM VITAE	491
12	ACKNOWLEDGMENTS	497
