Experimental optical imaging during pancreatic cancer interventions

Proefschrift

ter verkrijging van
de graad van doctor aan de Universiteit Leiden,
op gezag van rector magnificus prof. dr. ir. H. Bijl,
volgens besluit van het college voor promoties
te verdedigen op woensdag 13 december 2023
klokke 16.15 uur

door

Labrinus van Manen
geboren te Veenendaal
in 1994

Promotor:	Prof. dr. J.F. Hamming
Co-promotores:	Dr. J. Dijkstra Dr. J.S.D. Mieog
Promotiecommissie:	Prof. dr. S. Hernot (Vrije Universiteit Brussel, België) Prof. dr. J.E. van Hooft Dr. S. Keerweer (Erasmus MC, Rotterdam) Prof. dr. S. Kruijff (UMCG, Groningen)

Voor Jan-Willem

TABLE OF CONTENTS

Chapter 1	General introduction and thesis outline	13
------------------	---	----

Part I: Biomarkers in pancreatic cancer

Chapter 2	Elevated CEA and CA19-9 serum levels independently predict advanced pancreatic cancer at diagnosis	23
------------------	--	----

Chapter 3	Stage-specific value of Carbohydrate Antigen 19-9 and Carcinoembryonic Antigen serum levels on survival and recurrence in pancreatic cancer: a single center study and meta-analysis	41
------------------	--	----

Part II: Exogenous contrast imaging in pancreatic cancer

Chapter 4	A practical guide for the use of indocyanine green and methylene blue in fluorescence guided abdominal surgery	63
------------------	--	----

Chapter 5	Intraoperative detection of the remnant cystic duct during robot-assisted surgery using near-infrared fluorescence imaging: a case report	93
------------------	---	----

Chapter 6	Latest developments in molecular tracers for fluorescence image-guided cancer surgery	101
------------------	---	-----

Chapter 7	Near-infrared fluorescence imaging of pancreatic cancer using a fluorescently labelled anti-CEA nanobody probe: a preclinical study	125
------------------	---	-----

Part III: Endogenous contrast imaging in pancreatic cancer

Chapter 8	The clinical usefulness of optical coherence tomography during cancer interventions	141
------------------	---	-----

Chapter 9	Validation of full-field optical coherence tomography in distinguishing malignant and benign tissue in resected pancreatic cancer specimens	167
------------------	---	-----

Chapter 10	Single fiber reflectance spectroscopy for pancreatic cancer detection during endoscopic ultrasound guided fine needle biopsy: a prospective cohort study	183
-------------------	--	-----

Chapter 11	Detection of cutaneous oxygen saturation using a novel snapshot hyperspectral camera: a feasibility study	197
-------------------	---	-----

Part IV: Summary and appendices

Chapter 12	Summary and discussion	213
Chapter 13	Nederlandse samenvatting	223
	List of publications	227
	Curriculum Vitae	229
	Dankwoord	230
