Proefschrift

ter verkrijging van
de graad van doctor aan de Universiteit Leiden,
op gezag van rector magnificus prof.dr.ir. H. Bijl,
volgens besluit van het college voor promoties
te verdedigen op woensdag 20 december 2023
klokke 16.15 uur

door

Friso Matthijs Rijnberg
geboren te Rotterdam
in 1990

Promotor

Prof. dr. M.G. Hazekamp

Co-promotores:

Dr. A.A.W. Roest

Dr. ir. J.J.M. Westenberg

Promotiecommissie:

Prof. dr. N.A. Blom

Prof. dr. H.J. Lamb

Dr. ir. J.J. Wentzel (Erasmus Medisch Centrum, Rotterdam)

Prof. dr. K. François (Universitair Ziekenhuis Gent, Gent, België)

Prof. dr. Y.A.C. d'Udekem d'Acoz (Children's National, Washington, USA)

Financial support by the Dutch Heart Foundation for the publication of this thesis is gratefully acknowledged.

The research described in this thesis was supported by a grant from the Dutch Heart Foundation (2018-T083) and by a grant from Stichting Hartekind.

The printing of this thesis was financially supported by Pie Medical Imaging B.V. and Krijnen Medical Innovations B.V.

Table of contents

Chapter 1	General introduction and thesis outline	11
PART I	LONG-TERM OUTCOME AFTER THE FONTAN PROCEDURE	23
Chapter 2	A 45-year experience with the Fontan procedure: tachyarrhythmia, an important sign for adverse outcome <i>Interactive Journal of Cardiovascular and Thoracic Surgery 2019</i>	25
Chapter 3	Long-term outcome of direct relief of subaortic stenosis in single ventricle patients <i>World Journal for Pediatric and Congenital Heart Surgery 2018</i>	47
PART II	IN VIVO BLOOD FLOW DYNAMICS OF THE FONTAN CIRCULATION	63
Chapter 4	The influence of respiration on blood flow in the Fontan circulation: insights for imaging-based clinical evaluation of the total cavopulmonary connection <i>Frontiers Cardiovascular Imaging 2021</i>	65
Chapter 5	Reduced scan time and superior image quality with 3D flow MRI compared to 4D flow MRI for hemodynamic evaluation of the Fontan pathway <i>Scientific Reports 2021</i>	89
Chapter 6	Segmental analysis of blood flow dynamics in the TCPC	113
	Segmental assessment of blood flow efficiency in the total cavopulmonary connection using 4D flow MRI: vortical flow is associated with increased viscous energy loss <i>European Heart Journal open 2021</i>	115
	Four-dimensional flow magnetic resonance imaging-derived blood flow energetics of the inferior vena cava-to-extracardiac conduit junction in Fontan patients <i>European Journal of CardioThoracic Surgery 2019</i>	135

	Tornado-like flow in the Fontan circulation: insights from quantification and visualization of viscous energy loss rate using 4D flow MRI <i>European Heart Journal</i> 2019	153
Chapter 7	Assessment of extracardiac conduit adequacy	157
	Hemodynamic consequences of an undersized extracardiac conduit in an adult Fontan patient revealed by 4D flow MRI <i>Circulation Cardiovascular Imaging</i> 2021	159
	Extracardiac conduit adequacy along the respiratory cycle in adolescent Fontan patients <i>European Journal of CardioThoracic Surgery</i> 2021	167
Chapter 8	4D flow MRI derived energetics in the Fontan circulation correlate with exercise capacity and cT1 liver mapping <i>Journal of Cardiovascular Magnetic Resonance</i> 2022	193
PART III	COMPUTATIONAL FLUID DYNAMICS OF THE FONTAN CIRCULATION	213
Chapter 9	Energetics of blood flow in cardiovascular disease: concept and clinical implications of adverse energetics in patients with a Fontan circulation <i>Circulation</i> 2018	215
Chapter 10	Non-uniform mixing of hepatic venous flow and inferior vena cava flow in the Fontan conduit <i>Journal of the Royal Society Interface</i> 2021	251
Chapter 11	Hemodynamic performance of 16-20mm extracardiac conduits in adolescent Fontan patients <i>European Journal of CardioThoracic Surgery</i> 2022	273
Chapter 12	Summary and future perspectives	293
Chapter 13	Dutch summary	307
