Calcium-dependent regulation of auxin transport in plant development

Proefschrift

ter verkrijging van

de graad van doctor aan de Universiteit Leiden,

op gezag van rector magnificus prof.dr.ir. H. Bijl,

volgens besluit van het college voor promoties

te verdedigen op donderdag 11 januari 2024

klokke 10:00 uur

door

Xiaoyu Wei

Geboren te Yan'an (Shaanxi, China)

in 1989

Promotor:

Prof. dr. R. Offringa

Co-promotor:

Prof. dr. P.J.J. Hooykaas

Promotiecommissie:

Prof. dr. A.H. Meijer

Prof. dr. J. Memelink

Dr. S. Balazadeh

Prof. dr. R.M.H. Merks

Dr. M. Geisler, University of Fribourg

Prof. dr. ir. J.H.B. Sprakel, Wageningen University & Research

Contents

Chapter 1

The role of calcium as second messenger in auxin transport and signaling 7

Chapter 2

CALMODULIN-LIKE 12/TOUCH 3 and closely related calmodulins and calmodulin-like proteins redundantly interact with the PINOID kinase 67

Chapter 3

PINOID plasma membrane association and CALMODULIN-LIKE 12/TOUCH 3 binding converge on an amphipathic alpha-helix in the kinase insertion domain 99

Chapter 4

Calcium-regulated PINOID kinase activity is required for a robust spiral phyllotaxis in the Arabidopsis inflorescence 141

Summary 173

Samenvatting 181
