Data-Driven Donation Strategies

Understanding and Predicting Blood Donor Deferral

Proefschrift

ter verkrijging van
de graad van doctor aan de Universiteit Leiden,
op gezag van rector magnificus prof.dr.ir. H. Bijl,
volgens besluit van het college voor promoties
te verdedigen op donderdag 15 februari 2024
klokke 11:15 uur

door

Marieke Vinkenoog
geboren te Amsterdam
in 1993

Promotor:

Dr. M. van Leeuwen

Co-promotores:

Dr. M.P. Janssen

Sanquin Research & Universiteit Leiden

Dr. K. van den Hurk

Sanquin Research & Amsterdam UMC

Promotiecommissie:

Prof.dr. A. Plaat

Dr. M. Arvas

Finnish Red Cross Blood Service

Prof.dr. R. Groenwold

LUMC & Universiteit Leiden

Prof.dr. E. Steyerberg

LUMC, Erasmus MC & Universiteit Leiden

Prof.dr. D. Swinkels

Radboud UMC

This PhD project was a collaboration between two research groups:

1. Department of Transfusion Technology Assessment, Sanquin Research, Amsterdam, The Netherlands
2. Explanatory Data Analysis, Leiden Institute of Advanced Computer Science, Leiden University, Leiden, The Netherlands

Research presented in this thesis was funded by a peer reviewed grant from Sanquin's Fund for Product and Process Development Cellular Products (PPOC 18-14/L2337).

Design and illustration by Lotte & Marieke Vinkenoog

Contents

1	Introduction	1
1.1	Research questions and contributions	3
1.2	Outline of this thesis	6
1.3	List of publications	7
2	Preliminaries	9
2.1	Blood donation in the Netherlands	10
2.1.1	Iron metabolism	11
2.1.2	Iron monitoring strategies at Sanquin	11
2.2	Machine learning	14
2.2.1	Models, explanations and predictions	14
2.2.2	Classification for donor deferral	16
3	First results of a ferritin-based blood donor deferral policy in the Netherlands	19
4	Individual and environmental determinants of serum ferritin levels: a structural equation model	33
	Appendix	50

5	Challenges and limitations in clustering blood donor hemoglobin trajectories	55
6	Associations between symptoms, donor characteristics and IgG antibody response in 2082 COVID-19 convalescent plasma donors	71
	Appendix	86
7	Explainable hemoglobin deferral predictions using machine learning models: interpretation and consequences for the blood supply	95
8	An international comparison of hemoglobin deferral prediction models for blood banking	113
	Appendix	132
9	The added value of ferritin levels and genetic markers for the prediction of hemoglobin deferral	135
	Appendix	157
10	Conclusions, general discussion and anticipated future research	159
10.1	Conclusions	160
10.1.1	Hemoglobin and ferritin levels	160
10.1.2	SARS-CoV-2 antibodies	162
10.1.3	Prediction of hemoglobin deferral	163
10.2	General discussion	165
10.2.1	Hemoglobin measurement variability	165
10.2.2	Selection bias	167
10.2.3	Hemoglobin, ferritin and health	168
10.2.4	Reproducibility of study results	169
10.3	Anticipated developments and future research	170
	Bibliography	175
	Nederlandse samenvatting	193
