The research described in this thesis was supported by a grant from the Dutch Heart Foundation (DHF CVON2014-02 ENERGISE). Financial support by the Dutch Heart Foundation for the publication of this thesis is gratefully acknowledged.

Voor mijn lieve ouders

Table of contents

Chapter 1	General introduction and outline of this thesis	9
Chapter 2	Ventricular repolarization is associated with cognitive function, but not with cognitive decline and brain MRI measurements in older individuals	21
Chapter 3	Cardiac troponin, cognitive function, and dementia: a systematic review	39
Chapter 4	Exploring the possible causal effects of cardiac blood biomarkers in dementia and cognitive performance: a Mendelian Randomization study	65
Chapter 5	Interplay of circulating leptin and obesity in cognition and cerebral volumes in older adults	83
Chapter 6	Weight loss, visit-to-visit body weight variability and cognitive function in older individuals	105
Chapter 7	Examining the association of ¹ H-NMR metabolomics with cognitive performance and functional independence in older adults at increased risk of cardiovascular disease	125
Chapter 8	General discussion	143
Chapter 9	English summary	156
	Nederlandse samenvatting	159
	List of publications	162
	Dankwoord	163
	Curriculum vitae	164
