**Key words.** galaxies: ISM – galaxies: individual: NGC 253 – astrochemistry – galaxies: starburst – ISM: molecules – errata, addenda

Some errors were introduced during the preparation of the proofs of the published article. For a few molecules and transitions, the subscript numbers were changed to superscript. They should be: CO<sub>2</sub>, C<sub>2</sub>H, HNCO (4<sub>0,4</sub>–3<sub>0,3</sub>), and HNCO (10<sub>0,10</sub>–9<sub>0,9</sub>).
