CURRICULUM VITAE

Chloe Catherina Ann Grim werd geboren op 24 november 1990 in Kilkenny, Ierland. Zij behaalde in 2009 het eindexamen Gymnasium op het Lyceum aan Zee in Den Helder. In januari 2016 werd zij Master of Science in de Geneeskunde aan de Universiteit van Leiden. Vervolgens werkte zij als arts niet in opleiding tot specialist op de afdeling Interne Geneeskunde van het Groene Hart Ziekenhuis en op de Intensive Care van het Haga-ziekenhuis. In 2018 startte ze met promotieonderzoek op de Intensive Care van het Leids Universitair Medisch Centrum (LUMC). Hiernaast begon zij in 2020 aan de opleiding tot anesthesioloog in het LUMC. Zij woont samen met haar partner Joseph Arnoldus Bouwens en zij hebben twee dochters, Lois Mary Bouwens (geboren te Rotterdam in 2020) en Willow Jackie Bouwens (geboren te Rotterdam in 2022).

Chloe Catherina Ann Grim was born on November 24th 1990 in Kilkenny, Ireland. In 2009 she graduated the Gymnasium at the Lyceum aan Zee in Den Helder. In January 2016 she became a master of science in Medicine at the University of Leiden. She subsequently worked as a doctor not training as a specialist for the Internal Medicine department of the Groene Hart Hospital and for the Intensive Care Unit of the Haga Hospital. In 2018, she started PhD research for the Intensive Care Unit in the Leiden University Medical Center. She also started training as an anesthesiologist in the LUMC in 2020. She lives with her partner Joseph Arnoldus Bouwens and they have two daughters, Lois Mary Bouwens (born in Rotterdam in 2020) and Willow Jackie Bouwens (born in Rotterdam in 2022).

ACKNOWLEDGEMENTS

First and foremost I want to thank my promotor Evert, who gave me the opportunity for this PhD. Thank you for trusting me with the responsibility and allowing me to discover the ins and outs of setting up and managing an international trial. I highly appreciate your guidance and greatly enjoyed the freedom you allowed me with the different research projects and organization of my research activities. I want to thank my co-promotor Hendrik, for always being there when I needed help. I am very grateful to all the ICU patients who participated and to all the clinical staff who conducted the studies and who were of inestimable value for this thesis. I would also like to express my gratitude to my colleagues from the research team from the Intensive Care and Anesthesiology department. I could not have done it without you. Especially, Tine and Hyke, thank you for your support as colleagues and friends.

Thank you to my beautiful daughters, Lois and Willow, you made sure I had no time to worry about my PhD. And to Jos for supporting me. I hope this thesis will inspire our daughters to become educated and independent women. Also my parents and family deserve acknowledgement, you have always grounded me. Hopefully this book will answer most of your questions.
