The research described in this thesis was performed at Metabolomics and Analytics Center (MAC) of the Leiden Academic Centre for Drug Research (LACDR), Leiden University (Leiden, The Netherlands). The research was financially supported as indicated in each chapter.

Contents

Chapter 1	General introduction and scope	1
Chapter 2	Characterization of neonatal metabolism in low-birth-weight infants born to HIV suppressed mothers receiving cART	15
Chapter 3	Altered methionine-sulfone levels are associated with impaired growth in HIV-exposed-uninfected children	49
Chapter 4	Development of a targeted hydrophilic interaction liquid chromatography-tandem mass spectrometry based lipidomics platform applied to a coronavirus disease severity study	83
Chapter 5	Altered plasma lipidome is associated with disease severity in COVID-19 patients	125
Chapter 6	Conclusions and perspectives	151
Appendix	Nederlands samenvatting	161
	Curriculum vitae	165
	List of publications	166
	Acknowledgements	168
