FOR TARGETED CANCER TREATMENT**

Proefschrift

ter verkrijging van
de graad van doctor aan de Universiteit Leiden,
op gezag van rector magnificus prof. dr. ir. H. Bijl,
volgens besluit van het college voor promoties
te verdedigen op woensdag 6 maart 2024
klokke 15.00 uur

door

Jitske van den Bulk

geboren te Alkmaar

in 1994

PROMOTIECOMMISSIE

Promotor: Prof. dr. S.H. van der Burg
Co-promotores: dr. N.F. de Miranda
dr. ir. E.M.E. Verdegaal

Leden
promotiecommissie: Prof. dr. M.H.M. Heemskerk
Prof. dr. F.A. Ossendorp
Prof. dr. I.J.M. de Vries (Radboud UMC)
dr. W. Scheper (NKI)

TABLE OF CONTENTS

Chapter 1	General introduction and thesis outline	7
Chapter 2	Cancer immunotherapy: broadening the scope of targetable tumours	21
Chapter 3	Neoantigen-specific immunity in low mutation burden colorectal cancers of the consensus molecular subtype 4	45
Chapter 4	Therapeutic targeting of TGF- β in cancer: hacking a master switch of immune suppression	101
Chapter 5	CD103 and CD39 co-expression identifies neoantigen-specific cytotoxic T cells in colorectal cancers with low mutation burden	133
Chapter 6	Neoantigen targetability in progressive advanced melanoma	183
Chapter 7	Discussion and future perspectives	221
Appendices		235
	Nederlandse samenvatting	236
	Curriculum vitae	240
	List of publications	241
	Dankwoord	242
