A close-up photograph of two Bornean orang-utans. The orang-utan in the foreground is looking directly at the camera with a calm expression. The second orang-utan is positioned behind and to the right, leaning its head against the first one. Both animals have thick, reddish-brown fur and dark, wrinkled faces.

Tinder for orang-utans:

comparing sexually selective cognition among
Bornean orang-utans (*Pongo pygmaeus*) and
humans (*Homo sapiens*)
