Curriculum Vitae

Jing Yu (China, 1990) studied literature and medical science at Fudan University, where she received her bachelor's degree. She then enrolled in a joint master programme of Nanjing University and Ghent University with a focus on philosophy. From December 2016 onwards, she carried out the research reported here as a PhD candidate at the Institute of Philosophy at Leiden University. Her project, “An Ontology for Physical Necessity”, was funded by the China Scholarship Council.

Acknowledgments

I am profoundly grateful for the unwavering support and invaluable contributions from the remarkable individuals who played pivotal roles in shaping this dissertation.

First and foremost, I extend my heartfelt appreciation to Victor Gijsbers, my first supervisor. No words can adequately express the depth of my gratitude for your guidance, patience, and insightful discussions. The thesis has truly evolved under your tutelage, and your wise and deep-thought responses have left an indelible mark on its development. You are so talented in being the "midwife" of thoughts in the Socratic sense. Your encouragement and concern during moments of self-doubt and the kindness you extended in times of difficulty were crucial in navigating the challenges of this journey. I am indebted to you for illuminating the academic path and providing direction for my future endeavors.

Equally, I extend my sincere thanks to Maria van der Schaar, my second supervisor. The enriching discussions with you have not only deepened the solidity of the arguments but have also brought a clarity to the writings that would not have been possible without your insightful input. Your dedication to refining and enhancing the thesis has been truly invaluable. I am grateful for the positive spirit that defined our interactions. The collaborative atmosphere you cultivated made tackling the challenges of research both rewarding and enjoyable. Thank you for your continued mentorship, Maria,

A special appreciation goes to James McAllister, my promoter, for providing invaluable suggestions that enriched the depth and breadth of the thesis. Your keen insights and thoughtful guidance have been instrumental in shaping the final form of this work and are indispensable for the success of this dissertation.

To the members of the reviewing committee, your thoughtful suggestions and insightful feedback have significantly contributed to the overall improvement of this work. I am grateful for the time and expertise you dedicated to critically evaluating and enhancing the content.

I would like to extend a special thank you to Bati Fang, who provided invaluable technical assistance throughout the thesis process. From figure drawings to formula corrections, your expertise and support were crucial in overcoming various technical challenges. Your contribution has significantly enriched the quality of this work.

Additionally, my heartfelt thanks go to Frans de Haas, the coordinator, for skillfully organizing the reviewing committee and facilitating a constructive

evaluation process. Your efforts have been pivotal in ensuring the thorough examination of this thesis.

Finally, my deepest appreciation goes to Karineke Sombroek and the dedicated administrative team in my faculty for their unwavering assistance with various administrative matters. Karineke's diligence and professionalism have been indispensable in navigating administrative complexities.

To each of you, my heartfelt gratitude for your contributions to the completion of the dissertation. Additionally, there are others who have provided invaluable companionship and support throughout this PhD journey.

I want to express my deepest gratitude to my family, whose unwavering support has been my anchor throughout this journey. Your understanding and love have provided the emotional foundation that made this endeavor possible. Your sacrifices and belief have been a driving force, and for that, I am profoundly thankful.

As I reflect on this journey, I am reminded of the countless moments of solace and joy spent with friends who have been a source of strength and companionship. In particular, the 2nd and 3rd floors of the dormitory building of "Anatomy" have been more than physical spaces; they have been the backdrop to shared laughter and warmth. It is the camaraderie and collective spirit that have made the challenges of a Ph.D. more manageable.

To those whose names I haven't mentioned but who have enriched my life during this period, your impact is no less significant. The memories we created together, the shared meals, and the small moments of joy have been truly unforgettable, weaving a tapestry of experiences that I will cherish for a long time.

My heartfelt thanks to each and every one of you for being an integral part of this chapter in my life.
