# Single-cell immune profiling of atherosclerosis from omics to therapeutics

Proefschrift

ter verkrijging van  
de graad van doctor aan de Universiteit Leiden,  
op gezag van rector magnificus prof.dr.ir. H. Bijl,  
volgens besluit van het college voor promoties  
te verdedigen op donderdag 28 maart 2024  
klokke 16.15 uur

door

Marie Antoinette Christiane Depuydt  
geboren te Leiderdorp, Nederland  
in 1994

**Promotores**

Prof. dr. J. Kuiper  
dr. B. Slütter  
dr. I. Bot

**Promotiecommissie**

Prof. dr. H. Irth

The research described in this thesis was performed at the division of BioTherapeutics, Leiden Academic Centre for Drug Research (LACDR), Leiden University, the Netherlands. This thesis was financially supported by the Dutch Heart Foundation (CVON2017-20: GENIUS II). Financial support by the Dutch Heart Foundation for the publication of this thesis is gratefully acknowledged.

## Table of Contents

<b>Chapter 1</b>	General introduction	7
<b>Chapter 2</b>	The application of single-cell transcriptomics in healthy and diseased vasculature	45
<b>Chapter 3</b>	Microanatomy of the human atherosclerotic plaque by single-cell transcriptomics	91
<b>Chapter 4</b>	Single-cell T-cell Receptor sequencing of paired human atherosclerotic plaques and blood reveals autoimmune-like features of expanded effector T-cells	139
<b>Chapter 5</b>	Flow Cytometry-Based Characterization of Mast Cells in Human Atherosclerosis	181
<b>Chapter 6</b>	Aging promotes mast cell activation and antigen presenting capacity in atherosclerosis	201
<b>Chapter 7</b>	Blockade of the BLT1-LTB4 axis does not affect mast cell migration towards advanced atherosclerotic lesions in LDLr <sup>-/-</sup> mice	227
<b>Chapter 8</b>	Inhibition of Interleukin-4 Induced Gene 1 (IL4I1) stimulates a pro-inflammatory immune environment without affecting early atherosclerotic lesion development in LDL receptor knockout mice	253
<b>Chapter 9</b>	General discussion	271
<b>Appendix</b>	Nederlandse samenvatting	295
	Curriculum vitae	321
	Scientific publications	325
	PhD portfolio	333
