Proefschrift

ter verkrijging van
de graad van doctor aan de Universiteit Leiden,
op gezag van rector magnificus prof.dr.ir. H. Bijl,
volgens besluit van het college voor promoties
te verdedigen op dinsdag 9 april 2024
klokke 15.00 uur

door

Manolis Fragkiadakis

geboren te Athene, Griekenland
op 2 november 1988

Promotor: Prof. Dr. M.P.G.M. Mous
Copromotores: Dr. V.A.S. Nyst
Dr. P.W.H. van der Putten
Promotiecommissie: Prof. Dr. M.R. Spruit
Dr. E. Efthimiou (Athena Research Centre)
Dr. J. Prokic
Prof. Dr. F. Roelofsen (Universiteit van Amsterdam)

These trees don't take comfort in less sky,
these rocks don't take comfort under foreigners' footsteps,
these faces don't take comfort except in the sun,
these hearts don't take comfort except in justice
- Yiannis Ritsos

To the dew and freedom.

Acknowledgements

It is with a heart full of gratitude that I acknowledge those who accompanied me in the journey of my PhD.

I am indebted to my promotor, Professor Maarten Mous, whose guidance and expertise have been invaluable. Your mentorship and unwavering support have been pivotal in my academic development and the completion of this work.

I am equally grateful to my co-promoters, Victoria and Peter, for their insightful contributions and unfailing guidance throughout this journey. Victoria, for introducing me to the realm of sign languages and supporting me into learning International Sign. Peter, for challenging me to tinker with the things I researched throughout the years, both during my Master's as well as this PhD.

To my parents and my brother, the bedrock of my life. Your sacrifices and continuous support have been my constant source of strength and inspiration. To my family back in Greece, for always being there for me during my last minute trips back home. Special thanks goes to my cousin Panagiotis for putting the seed of research in me.

To my wife, my partner in life, your love, patience, and understanding, have been my sanctuary. Your unceasing support and belief in me have been the pillars I have leaned on throughout this journey.

I would also like to thank my family in Italy for making me able to say that I have a family there.

To my friends in Leiden: Stelios, Marios, George and Antonis, with whom I shared this journey. Our discussions and music sessions will always have a special place in my heart. The camaraderie we shared were

crucial in keeping my spirits high and maintaining a sense of balance during my studies.

I would like to express my gratitude to Thies and Eli, Francesco, and Elena, for their companionship and moral support, especially during the challenging times of the lockdown.

My heartfelt thanks to Maarten for being there since the first years of the Master's program and who I'm proud to call my first Dutch friend.

I extend my gratitude to my "little brother" Federico and his wife Giulia. Our first years in Leiden, exploring the Netherlands, were some of the most transformative of my life.

I would like to thank my friends in Delft Tasos, Iro, Fotis, Nancy, Yannis and Orestis: your friendship and moral support have made this journey enjoyable and fun.

I am also deeply grateful to my colleague Martin and my colleagues at LUCDH, my colleagues at the Data Science Research Programme and LUCL.

Finally, I would like to express my gratitude to my friends George, Alexis, Lefteris, Sifis, Thanos and Dimitris for being there for me no matter the distance that separates us.

List of Abbreviations

Abbreviation	Definition
ANN	Artificial Neural Networks
ASJP	Automated Similarity Judgment Program
ASL	American Sign Language
AUC	Area Under the Receiver Operating Characteristics
AUTSL	Ankara University Turkish Sign Language Dataset
BLSTM	Bidirectional Long-Short-Term Memory
CART	Classification And Regression Tree
CNN	Convolutional Neural Network
CSLR	Continuous Sign Language Recognition
CTC	Connectionist Temporal Classification
CV	Computer Vision
DBSCAN	Density-Based Spatial Clustering of Applications with Noise
DGS	German Sign Language
DTW	Dynamic Time Warping
GAN	Generative Adversarial Network
GBM	Gradient Boosting
GRU	Gated Recurrent Unit
GSL	Ghanaian Sign Language
HamNoSys	Hamburg Notation System
HCORF	Hidden Conditional Ordinal Random Fields
HMM	Hidden Markov Model
HOG	Histogram of Oriented Gradient
IPA	International Phonetic Alphabet
LBP	Local Binary Patterns

LR	Linear Regression
LSTM	Long-Short-Term-Memory
MG	Motion Graph
MDDTW	Multi-Dimensional Dynamic Time Warping
MDN	Mixture Density Network
MPI	Max Planck Institute
MS	Microsoft
NLP	Natural Language Processing
NMT	Neural Machine Translation
NN	Neural Network
PCA	Principal Component Analysis
RCNN	Region Based Convolutional Neural Networks
RDFR	Random Forests for Regression
ReLU	Rectified Linear Unit
RF	Random Forest
RNN	Recurrent Neural Network
SL	Sign Language
SLP	Sign Language Processing
SLP	Sign Language Production
SLR	Sign Language Recognition
SLT	Sign Language Translation
SNN	Siamese Neural Network
SVM	Support Vector Machines
TAG	Tree Adjoining Grammar
UMAP	Uniform Manifold Approximation and Projection
VAE	Variational AutoEncoder
VGT	Flemish Sign Language
WLASL	Word-Level American Sign Language
WOCAL	World Congress of African Linguistics
WSS	Within Cluster Sum of Square
XGBoost	Extreme Gradient Boosting
