Prof. dr. R.H.H. Groenwold

Prof. dr. P.M.L.A. van den Bemt (University Medical Center Groningen)

Financial support by the Dutch Heart Foundation and the Federation of Dutch Thrombosis Services (FNT) for the publication of this thesis is gratefully acknowledged.

Table of Contents

Chapter 1	General introduction and outline of the thesis	7
Chapter 2	Time trends in patient characteristics, anticoagulation treatment, and prognosis of incident nonvalvular atrial fibrillation in the Netherlands	19
Chapter 3	Anticoagulant prescription pattern and prognosis of non-valvular atrial fibrillation patients by sex, baseline CHA ₂ DS ₂ -VASc score, and HAS-BLED score	43
Chapter 4	Predictors, time course, and outcomes of persistence patterns in oral anticoagulation for non-valvular atrial fibrillation: a Dutch nationwide cohort study	75
Chapter 5	Epidemiology of coexisting atrial fibrillation and cancer in the Netherlands: prevalence, incidence, time trends, and associations with all-cause mortality	103
Chapter 6	Anticoagulant therapy and prognosis in patients with atrial fibrillation and cancer: a nationwide population-based study	129
Chapter 7	Antithrombotic therapy during pregnancy and maternal/foetal/newborn outcomes in the Netherlands (2013-2019): a population-based cohort study	153
Chapter 8	Comparison of excess mortality between a chronically anticoagulated population and the general population during the COVID-19 pandemic in 2020 in the Netherlands	187
Chapter 9	Summary and general discussion	209
Appendices	Nederlandse Samenvatting (Dutch Summary) List of Publications Curriculum Vitae Acknowledgements Portfolio	221
