of nanopore long-read sequencing
for small to large sized genomes**

Cover art: Elephant by Michael Liem.

Referring to the largest sequencing reads among sequencing technologies.
The plethora of animal illustrations decorating the elephant represents the Oxford Nanopore Technologies slogan "*To enable the analysis of anything, by anyone, anywhere.*"

“You must be shapeless, formless, like water.
When you pour water in a cup, it becomes the cup.
When you pour water in a bottle, it becomes the bottle.
When you pour water in a teapot, it becomes the teapot.
Water can drip and it can crash.
Become like water my friend.”

– Bruce Lee
