Matter into context

Population- and community-level impacts of nanomaterials in
freshwater ecosystems

Proefschrift

ter verkrijging van

de graad van doctor aan de Universiteit Leiden,
op gezag van rector magnificus prof.dr.ir. H. Bijl,
volgens besluit van het college van promoties
te verdedigen op woensdag 24 april 2024
klokke 15:00 uur
door

Tom Adrianus Pieter Nederstigt

geboren te Haarlem, Nederland

in 1991

Promotores:

Prof. dr. ing. M.G. Vijver

Prof. dr. ir. W.J.G.M. Peijnenburg

Promotiecomissie:

Dr. ir. T. Bosker

Prof. dr. G.R. de Snoo

Dr. M. Schrama

Prof. dr. L.N. de Senerpont Domis (Universiteit Twente)

Prof. dr. ir. C.A.M. van Gestel (Vrije Universiteit Amsterdam)

The work presented in this thesis has in part been conducted under the European Union Horizon 2020 project PATROLS; ‘Physiologically Anchored Tools for Realistic nanOMaterial Safety testing’ - grant number 760813. Outcomes of this project can be found on www.patrols-h2020.eu and have been discussed in detail by Doak et al. (2022).

Contents

6. Summary
10. Samenvatting
15. **CHAPTER 1**
General introduction
35. **CHAPTER 2**
Nanomaterial-specific guidelines within long-term *Daphnia magna* toxicity assays: a case study on multigenerational effects of nanosized TiO₂ and CeO₂ in the presence of artificial daylight
57. **CHAPTER 3**
Correlation analysis of single- and multigenerational endpoints in *Daphnia magna*: a case study using TiO₂ nanoparticles
77. **CHAPTER 4**
Impacts of a novel controlled-release TiO₂-coated (nano-) formulation of carbendazim and its constituents on freshwater macroinvertebrate communities
99. **CHAPTER 5**
Zooplankton community turnover in response to a novel TiO₂-coated nano-formulation of carbendazim and its constituents
121. **CHAPTER 6**
Viewpoint: Sustainability claims of nano-enabled pesticides require a more thorough evaluation
127. **CHAPTER 7**
General discussion
140. References
164. Curriculum vitae
165. List of publications
166. Acknowledgements
168. Appendix
