# The developing infant gut microbiota: Mathematical predictions of the effects of oligosaccharides

Proefschrift

ter verkrijging van  
de graad van doctor aan de Universiteit Leiden,  
op gezag van rector magnificus prof.dr.ir. H. Bijl,  
volgens besluit van het college voor promoties  
te verdedigen op dinsdag 23 april 2024  
klokke 13:45 uur

door

David Mattias Versluis

geboren te Gorinchem

in 1996

**Promotores:**

Prof. dr. R.M.H. Merks

Prof. dr. H.P. Spaink

**Promotiecommissie:**

Prof. dr. A. H. Meijer

Prof. dr. V. van Noort

Prof. dr. D. Claessen

Prof. dr. I. Thiele

Dr. K. Faust

Dr. C. Belzer

University of Galway

KU Leuven

Wageningen University & Research

*It is for many of us incomparably more interesting to be wandering in a half-light uncovering hidden truths, bumping into others similarly occupied and adding to a body of knowledge to which one's friends and contemporaries are contributing, than to be reading a complete account of established facts.*

Marjory Stephenson, *Bacterial Metabolism*, Longmans, Green and Co. (1948)

# Contents

<b>1</b>	<b>Introduction</b>	<b>1</b>
1.1	The infant gut microbiota . . . . .	2
1.2	Modelling the infant gut microbiota . . . . .	9
1.3	Thesis outline . . . . .	16
<b>2</b>	<b>A multiscale spatiotemporal model including a switch from aerobic to anaerobic metabolism reproduces succession in the early infant gut microbiota</b>	<b>17</b>
2.1	Introduction . . . . .	19
2.2	Results . . . . .	22
2.3	Discussion . . . . .	36
2.4	Methods . . . . .	42
2.5	Supplemental material . . . . .	53
2.6	Contributions . . . . .	66
2.7	Acknowledgments . . . . .	66
<b>3</b>	<b>2'-Fucosyllactose helps butyrate producers outgrow competitors in infant gut microbiota simulations</b>	<b>67</b>
3.1	Introduction . . . . .	69
3.2	Results . . . . .	70
3.3	Discussion . . . . .	82
3.4	Methods . . . . .	86
3.5	Supplemental material . . . . .	93
3.6	Contributions . . . . .	99
3.7	Acknowledgments . . . . .	99
<b>4</b>	<b>Human milk oligosaccharide decreases microbial mucin consumption by stimulating bacteria that do not share extracellular resources in infant gut simulations</b>	<b>100</b>
4.1	Introduction . . . . .	102
