# Discovery of selective diacylglycerol lipase $\beta$ inhibitors

Proefschrift

ter verkrijging van  
de graad van doctor aan de Universiteit Leiden,  
op gezag van rector magnificus prof.dr.ir. H. Bijl,  
volgens besluit van het college voor promoties  
te verdedigen op woensdag 22 mei 2024  
klokke 15:00 uur

door

**Na Zhu**

geboren te Ganzhou, China  
in 1993

**Promotor**

Prof. dr. M. van der Stelt

**Co-promotores**

Dr. A.P.A. Janssen

Dr. R.J.B.H.N. van den Berg

**Promotiecommissie**

Prof. dr. M. Ubbink

Dr. M.E. Artola Perez de Azanza

Prof. dr. N.I. Martin

Dr. P.P. Geurink (Leiden University Medical Center)

Prof. dr. I.J.P. de Esch (Vrije University Amsterdam)

*There is only one heroism in the world: to see the world as it is and to love it.*

Romain Rolland

# Table of contents

<b>Chapter 1</b>	<b>1</b>
General introduction	
<b>Chapter 2</b>	<b>23</b>
A fluorescent surrogate substrate assay for high-throughput screening for DAGL $\beta$	
<b>Chapter 3</b>	<b>47</b>
Structure-activity relationship study of glycine sulfonamides as DAGL $\alpha/\beta$ inhibitors	
<b>Chapter 4</b>	<b>113</b>
Optimization of glycine sulfonamides as DAGL $\beta$ selective inhibitors	
<b>Chapter 5</b>	<b>205</b>
Profiling DAGL inhibitors in the GRAB <sub>eCB2.0</sub> assay reveals the primary role of DAGL $\alpha$ in ATP-stimulated 2-AG production in Neuro2A	
<b>Chapter 6</b>	<b>221</b>
Glycine sulfonamides act as selective DAGL $\beta$ inhibitors and reduce inflammation	
<b>Chapter 7</b>	<b>243</b>
Summary and Future Prospects	
<b>Nederlandse Samenvatting</b>	<b>265</b>
<b>Summary in Chinese</b>	<b>269</b>
<b>List of publications</b>	<b>273</b>
<b>Curriculum Vitae</b>	<b>275</b>
