Discovery of selective diacylglycerol lipase β inhibitors

Proefschrift

ter verkrijging van
de graad van doctor aan de Universiteit Leiden,
op gezag van rector magnificus prof.dr.ir. H. Bijl,
volgens besluit van het college voor promoties
te verdedigen op woensdag 22 mei 2024
klokke 15:00 uur

door

Na Zhu

geboren te Ganzhou, China
in 1993

Promotor

Prof. dr. M. van der Stelt

Co-promotores

Dr. A.P.A. Janssen

Dr. R.J.B.H.N. van den Berg

Promotiecommissie

Prof. dr. M. Ubbink

Dr. M.E. Artola Perez de Azanza

Prof. dr. N.I. Martin

Dr. P.P. Geurink (Leiden University Medical Center)

Prof. dr. I.J.P. de Esch (Vrije University Amsterdam)

Printed by: Ipskamp Printing

Cover design: Na Zhu

There is only one heroism in the world: to see the world as it is and to love it.

Romain Rolland

Table of contents

Chapter 1	1
General introduction	
Chapter 2	23
A fluorescent surrogate substrate assay for high-throughput screening for DAGL β	
Chapter 3	47
Structure-activity relationship study of glycine sulfonamides as DAGL α/β inhibitors	
Chapter 4	113
Optimization of glycine sulfonamides as DAGL β selective inhibitors	
Chapter 5	205
Profiling DAGL inhibitors in the GRAB _{eCB2.0} assay reveals the primary role of DAGL α in ATP-stimulated 2-AG production in Neuro2A	
Chapter 6	221
Glycine sulfonamides act as selective DAGL β inhibitors and reduce inflammation	
Chapter 7	243
Summary and Future Prospects	
Nederlandse Samenvatting	265
Summary in Chinese	269
List of publications	273
Curriculum Vitae	275
