Quantitative Pharmacology Approaches to Inform Treatment Strategies Against Tuberculosis

Proefschrift

ter verkrijging van
de graad van doctor aan de Universiteit Leiden, op gezag van
rector magnificus prof.dr.ir. H. Bijl,
volgens besluit van het college voor promoties
te verdedigen op donderdag 30 mei 2024
klokke 13:45 uur

door

Krina Mehta

geboren te
Bhavnagar, Gujarat, India
in 1983

Promotores:

Prof. dr. J.G.C. van Hasselt

Prof. dr. P.H. van der Graaf

Promotiecommissie:

Prof. dr. H. Irth

Prof.dr. E.C.M. de Lange

Prof.dr. C.A.J. Knibbe

Dr E.M. Svensson, Uppsala University, Uppsala, Sweden

Prof. dr. R.E. Aarnoutse, Radboud University Medical Center, Netherlands

TABLE OF CONTENTS

Section I. Introduction	8
Chapter 1. Introduction and scope of the thesis	11
Section II. Quantitative Pharmacology Approaches for First-Line Anti-Tuberculosis Therapeutics	22
Chapter 2. Optimizing ethambutol dosing among HIV/tuberculosis co-infected patients: a population pharmacokinetic modelling and simulation study	25
Chapter 3. Pharmacogenetic variability and the probability of site of action target attainment during tuberculosis meningitis treatment: a physiologically based pharmacokinetic modeling and simulations study	49
Section III. Quantitative Pharmacology Approaches for Newer Anti-Tuberculosis Therapeutics	72
Chapter 4. Predictions of bedaquiline and pretomanid target attainment in lung lesions of tuberculosis patients using translational minimal physiologically based pharmacokinetic modeling	75
Chapter 5. Model-based dose optimization framework for bedaquiline, pretomanid, and linezolid for the treatment of drug-resistant tuberculosis	111
Chapter 6. predictions of bedaquiline central nervous system exposure in tuberculosis meningitis patients using physiologically-based pharmacokinetic modeling	139
Section IV. Host-directed therapies against tuberculosis	162
Chapter 7. Host-directed therapies for tuberculosis: quantitative systems pharmacology approaches	165
Chapter 8. Quantitative systems pharmacology modeling framework of autophagy in tuberculosis: application to adjunctive metformin host-directed therapy	187

Section V. Summary and General Discussion	208
Chapter 9. Summary and general discussion	211
Hoofdstuk 10. Nederlandse samenvatting	227
Section VI. Appendices	230
Curriculum vitae	232
List of publications	233
Acknowledgements	235
