## **Acknowledgements**

I would like to thank Paris Sciences et Lettres for accepting my research project in 2017 and awarding me three years of funding to carry it out, thereby providing me with the best possible conditions to conduct and complete my doctoral research. I am equally grateful to the École pratique des hautes études, within the framework of which this doctoral thesis was prepared, for their professional help and financial support, thanks to which I was able to travel abroad to participate in conferences and present my ongoing research. I thank Leiden University for accepting me as a cotutelle student in 2019, for their encouragement and kind support, especially during the difficult time of the Covid pandemic.

I thank the Institut français de Recherche en Iran (IFRI) for awarding me a three-month travel grant (2018) with which I was able to travel to Iran for my fieldwork. I warmly thank the Pajouhešgāh-e 'Olum Ensāni va Motāle'āt-e Farhangi (IHCS) and in particular Professor Dr. Cyrus Nasrollāhzādeh who applied for a research visa on my behalf, allowing me to visit the archaeological sites of Fārs. I am very grateful to Dr. Hamid Fadaei, director of the Persepolis World Heritage Site, and Mohammad Jawad Ouladhussein (Centre for Epigraphical Studies, Persepolis World Heritage Site), vice-president of Persepolis, for giving me permission to visit the sites of Persepolis and Naqš-e Rostam and to study its monuments and inscriptions in December 2018.

At the École pratique des hautes études, my supervisor Professor Philip Huyse (EPHE-PSL/CeRMI) and Dr. Samra Azarnouche (EPHE-PSL/CeRMI) have been following my progress and providing me with valuable feedback on my work since my Masters dissertation. I am indebted to them both for introducing me to ancient Iran and to the study of ancient Iranian languages, as well as for their encouragement in pursuing a doctoral project and their helpful remarks and advice as it took shape. At Leiden University, I would like to express my sincere thanks to my supervisor Albert de Jong, whose unwavering support and constructive comments saw me safely through the writing process and its rough patches. Our cheerful and engaging monthly meetings, in which we discussed my readings, written works and ideas, anchored my progress and reminded me that I should enjoy my research – they will remain a highlight of the past few years.

I would like to express my deep gratitude to my colleague Milad Abedi (Zurich University/CeRMI) for accompanying me on my fieldwork in Iran, for his patient help, support and friendship. I warmly thank my friends and colleagues at the École pratique des hautes études, Delphine, Alberto, Alessia and Aida, for their advice and kindness and for breaking up the solitude of doctoral research. I would like to thank my dearest and oldest friends Ayaka, Fern and Xanthippi, for their constancy and support – our regular conversations did much to brighten up my writing routine and keep me grounded. I extend my heartfelt thanks to Sylvie for our stimulating conversations and her patient guidance and kindness, and for reminding me to take pleasure in everything I do.

My greatest source of comfort and courage throughout these six years of research and writing has been my beloved family, whom I thank wholeheartedly for their support. I would like to thank my grandmother, Christiane de Sales, for her kindness and encouragement and for being my refuge when I needed it most; my parents Anne de Sales and Charles Ramble, for their unwavering enthusiasm and reassurance, as well as their valuable comments and advice, and for giving me the love of research and writing; my wonderful little sister Charlotte, for her constant care and thoughtfulness, and for our innumerable conversations and laughs which have been a most precious source of energy and comfort; and François Vandame, whose extraordinary patience and unshakable confidence in me was and is my greatest strength.
