Rhythms of resilience

Individual differences in genetic and environmental effects on brain development

Proefschrift

ter verkrijging van
de graad van doctor aan de Universiteit Leiden,
op gezag van rector magnificus prof.dr.ir. H. Bijl,
volgens besluit van het college voor promoties
te verdedigen op 18 juni 2024
klokke 12:30 uur

door
Lina van Drunen
geboren te Amsterdam
in 1992

Promotor

Prof.dr. E.A. Crone

Co-promotor

Dr. L.M. Wierenga

Promotiecommissie

Prof.dr. H.E. Hulst (wetenschappelijk directeur instituut Psychologie / voorzitter)

Prof.dr. S.A.R.B. Rombouts

Prof.dr. C.K. Tamnes (Universiteit van Oslo)

Dr. M. Bos

Dr. B.R. Braams (Vrije Universiteit Amsterdam)

The studies detailed in this thesis are part of the Consortium on Individual Development (CID), which is supported by a Gravitation grant provided by the Dutch Ministry of Education, Culture, and Science, and the Netherlands Organization for Scientific Research (NWO grant number 024.001.003).

Information is a difference that makes the difference.

- Gregory Bateson

TABLE OF CONTENTS

Chapter 1	General Introduction	9
Chapter 2	Genetic and environmental influences on structural brain development from childhood to adolescence: A longitudinal twin study on cortical thickness, surface area, and subcortical volume	29
Chapter 3	Brain development and musical skills: A longitudinal twin study on brain developmental trajectories and sensorimotor synchronization	69
Chapter 4	Effects of COVID-19 pandemic on structural brain development in early adolescence	109
Chapter 5	The nature of the self: Neural analyses and heritability estimates of self-evaluations in middle childhood	135
Chapter 6	General Discussion	163
Addendum	Dutch Summary (Nederlandse samenvatting)	185
	Acknowledgments (Dankwoord)	211
	References	215
	List of publications (Publicatie lijst)	255
	Curriculum vitae	259
