Rhythms of resilience: individual differences in genetic and environmental effects on brain development

Drunen, L. van

ACKNOWLEDGMENTS (DANKWOORD)

Het voltooien van dit proefschrift markeert het einde van een boeiende en intense academische reis, en ik ben dankbaar voor de vele mensen die me hebben geïnspireerd en gesteund gedurende deze periode. Mijn dank gaat eerst uit naar de leden van de leescommissie, **Prof. Dr. Serge Rombouts, Prof. Dr. Christian Tamnes, Dr. Marieke Bos, en Dr. Barbara Braams**.

Daarnaast een grote waardering voor mijn begeleidingsteam. Ik begin bij mijn promotor **Eveline** bij wie ik enorm geïnspireerd ben geraakt door haar visionaire blik op de wetenschap, positieve aanmoediging, en unieke bijdragen om wetenschap met maatschappij te verbinden. Ik verliet onze afspraken altijd met grote motivatie om nieuwe uitdagingen aan te gaan. Jouw toewijding aan mijn academische groei heeft mijn onderzoeksreis enorm verrijkt. **Lara**, jou wil ik bedanken voor je bovenmaatse wijsheid en vermogen om in de diepte te duiken van mijn studies. Of het nu ging om scripten in R of het uitdenken van onderzoeksvragen, jij bracht de wetenschap altijd naar een hoger niveau. Als laatste wil ik mijn co-auteurs bedanken, in het bijzonder **Rebecca**, met wie ik een inspirerende samenwerking ben aangegaan om muzikaliteit in kinderen te meten.

Ook een speciale waardering voor mijn paranimfen. **Simone**, ik kan me geen betere 'wetenschapstweeling' op ons tweelingproject indenken. Het was echt fantastisch om met jou 600 kinderen in de MRI-scanner te meten, congressen te ervaren, te relativeren, te filosoferen, en onze passie voor de wetenschap te beleven. Vaak ging dit gepaard met een grote lach waarbij ons teamgevoel altijd standhield, ook wanneer er wetenschapsperikelen boven kwamen drijven. **Daniel**, bijzonder dat je naast me staat tijdens het verdedigen van mijn proefschrift. Wij vonden onze gelijkenissen in ondernemen en onderzoeken, waarbij jij mij strijdlustig verstand hebt weten bij te leren tijdens uitdagende momenten.

Ik ben dankbaar voor de steun van mijn collega's. **Michelle en Mara**, door jullie benaderbaarheid, betrokkenheid, en enthousiasme konden ik en Simone het stokje overnemen om het project af te ronden. **Olga en Sjoerd**, jullie bijdragen aan de dataverzameling, organisatie, en altijd leuke werksfeer was enorm. Jullie zorgden voor het juiste teamgevoel. Maar ook **Jana, Lisanne, Judith, Simone, Stephan, Saskia, Bianca, Veronica, en Bram**, bedankt voor al jullie fantastische inzet en bijdragen aan een stimulerende onderzoeksomgeving.

Binnen het SYNC lab: **Yara,** sinds je komst in het lab heb ik genoten van onze fijne samenwerking en passie voor het analyseren van innovatieve modellen. Bij jou is nooit een vraag te veel en je inspireert mij in je manier van

'team science' uitoefenen om samen hogere doelen te bereiken. **Kayla,** we zijn samen de eindsprint van het schrijven van ons proefschrift ingegaan. Hierdoor heb ik ervaren hoeveel positieve steun en aanmoediging je iemand zowel binnen als buiten de wetenschap kunt bieden. Dit heeft mijn motivatie gevoed om door te blijven schrijven. **Ilse,** na onze gesprekken voelde ik me geïnspireerd en had ik nieuwe ideeën voor aanvullingen op mijn projecten. We deelden vaak onze gedachten over de implicaties van onze bevindingen en ik heb echt genoten van onze gedeelde interesse in innovatieve datavisualisaties. **Karlijn,** binnen jouw postdoc rol zorgde je voor een innovatieve blik op het delen van kennis tussen wetenschap en maatschappij. Dit doet het veld verder ontwikkelen en ik heb veel gehad aan jouw nieuwe aanpak hierin. En ook bedankt alle overige (oud)collega's uit Rotterdam en Leiden, ik heb veel geleerd van jullie talenten om professioneel te groeien als wetenschapper: **Renske, Suzanne, Sophie, Mark, Ties, Jochem, Laura, Philip, Eduard, Andrik, Lysanne, Fabienne, Yolijn, Nienke, Eleni, Iris, Sanne, Bianca, Berna, Annelinde, Ili, Jorien, Kiki, Lisa, Marieke, Neeltje B.**

Mijn diepe waardering gaat ook uit naar mijn lieve vrienden en familie. In het bijzonder, **Yuna**, een zeer creatieve vriendin die de kaft van mijn proefschrift heeft geïllustreerd. Daarnaast voor mijn vader en moeder, **Bert en Saskia**, jullie onvoorwaardelijke steun heeft mijn successen waardevoller gemaakt en de academische reis lichter. Jullie leerden me dat de echte vreugde schuilt in het proces van ontwikkeling, eerder dan in het uiteindelijke resultaat. Deze waardevolle les heeft bijgedragen aan een bescheiden blik op zowel mezelf als de wereld om me heen. **Loes en Reinier** mijn aanvullende familie: jullie warme betrokkenheid, aanmoediging, en bovenal de veilige haven die jullie op woensdagen bieden voor Dunya, vervullen mij met grote dankbaarheid.

Sicco, jouw onmisbare bijdrage verdient alle lof. Je voelt altijd feilloos aan wat ik nodig heb, of het nu gaat om het vieren van successen of het aangaan van uitdagingen. De timing van jouw unieke humor en luchtigheid stelt me in staat om te relativeren te midden van commotie. Als ik aan ons denk, zie ik een dream-team voor me, met als kers op de taart de toevoeging van Dunya aan ons gezin. **Dunya,** het stralende middelpunt in ons huis. De combinatie van moederschap en wetenschappelijke toewijding geeft me het vertrouwen dat ik elke uitdaging aankan. Door jou verzet ik alle bergen.

CURRICULUM VITAE

CURRICULUM VITAE

Lina van Drunen was born on April 6th, 1992, in Amsterdam, the Netherlands. After graduating from secondary school (Vossius Gymnasium, Amsterdam) in 2010, she went to the University of Amsterdam to study neuroscience. Lina obtained her Bachelor's degree in Psychobiology in 2016 and her Research Master's degree in Cognitive Neurobiology and Clinical Neurophysiology in 2019. During her first Master internship, Lina worked as a research intern at the Clinical Neurophysiology department, Amsterdam University Medical Centre, where she accumulated expertise in employing Deep Brain Stimulation for individuals with Parkinson's Disease. During the second year of her Masters, she joined the Brain and Development Research Center as part of the Leiden Consortium on Individual Development (L-CID) at Leiden University where she acquired her initial experience with developmental neuroscience in children. Pursuing her interest in developmental neuroscience, Lina started her PhD project in 2019 as part of L-CID at Leiden University under supervision of Prof. dr. Eveline Crone and dr. Lara Wierenga. In her project, she focused on individual differences in genetic and environmental effects on brain development in children and early adolescents using a large longitudinal twin-design. Starting in 2020, Lina also became a member of the Youth and Neuroscience Connected (SYNC) lab at Erasmus University Rotterdam. She will continue her research line on developmental neuroscience as a post-doctoral researcher at Erasmus University Rotterdam. Besides feeling the rush of science, she gets her adrenaline from playing several sports on a high level. For years, Lina played as a professional field hockey player on a national and international level including winning the National Championships in 2009 and two times the European Championships under 16 and 18 in 2008 and 2009.
