Organs-on-chip: towards therapies for cardiovascular disease using human stem cells

This thesis was prepared at the Department of Anatomy & Embryology of the Leiden University medical Center, Leiden, The Netherlands. The work presented in this thesis was supported by the Netherlands Organ-on-Chip Initiative, an NWO Gravitation project (024.003.001) funded by the Ministry of Education, Culture, and Science of the government of The Netherlands and The Novo Nordisk Foundation Center for Stem Cell Medicine supported by Novo Nordisk Foundation grant (NNF21CC0073729).

Financial support from the Dutch Heart Foundation, the Willy van Heumenfonds, and Proefdier vrij for the publication of this thesis is gratefully acknowledged.

Additional financial support was also granted by nCardia Bv. and is greatly appreciated.
