Curriculum Vitae

Jianhong Zhou was born in January 1, 1990 in Changshan, Quzhou, China. After graduating from Quzhou No. 2 high school in 2008, she studied biology science at Shaoxing University. In an elective class, she watched the film "An Inconvenient Truth" and was shocked by the profound impact of climate change showed in the film. Since then, she was motivated to study a postgraduate program which related to climate change. Therefore, after obtaining her bachelor's degree, she pursued her MSc degree in Ecology at East China Normal University (ECNU) in Shanghai, China (2012-2015). There, she was supervised by Prof. Kaiyun Wang, who specializes in global change ecology. She conducted her master research in an enclosed tidal wetland located at the east of Chongming Island to investigate the soil salinity dynamics after reclamation and its effect on plant growth in the context of climate change by long-term monitoring. During her master study, she was awarded a fund from ECNU as a visiting student to the University of California, Riverside, USA for three months. In 2016, she received China Scholarship Council (CSC) scholarship to study in the Netherlands for a doctorate. She spent one year at Soil Physics and Land Management Group in Wageningen University. Since September 2017, she has joined the Institute of Environmental Sciences (CML) under the supervision of Prof. Peter van Bodegom and Dr. Ellen Cieraad to pursue her doctorate degree on the topic about phenotypic plasticity and genetic adaptation of plant functional traits under changing climatic conditions.

Acknowledgements

Finally, it comes to almost the end of my PhD journey. It has been an unexpectedly long journey, if I count it since September, 2016, when I came to the Netherlands first time and started to pursue my PhD degree. Completing PhD has been undoubtedly challenging, as the ups and downs I have experienced during the past eight years likes the feelings of taking roller coasters. It's not only an academic adventure, but also a self-exploring journey which makes me connect to myself more deeply. At the same time, I would like to acknowledge a lot of wonderful people who helped me during this journey. Only with your strong support, inspiration, care and accompany, it has made it possible for me to land safely at the finishing line.

First and foremost, I would like to express my sincerely gratitude to my promotors, Prof. Peter van Bodegom and Dr. Ellen Cieraad. Thank you both for your patient supervision and strong emotional support, which makes my PhD journey much more enjoyable. Dear Peter, thank you for giving me the opportunity to restart my PhD journey and providing this interesting research topic to explore. Thank you for guiding me through the research project hand in hand, from grasping the fundamental concepts in the literature to explaining the data critically and inspiring me to write papers with unique storylines. In addition to help improve my academic skills, you also kindly guide me through some struggles of my own mindset, offering diverse perspectives to help me recognize my merits and embrace my vulnerability with self-love and patience. Dear Ellen, thank you for your full support and continuous encouragement on every single step forward. With sophisticated knowledge and skills in statistics and programming, you always provide me useful techniques in data compiling and analyses, which makes my research advance more smoothly. Your thoughtful advice on oral presentation and meeting preparation soothes my nerves. In particular, thank you so much for deciding accompany with me along my whole PhD journey, even after you moved to New Zealand. Being in a different time zone, you keep spending evenings on supervising me remotely. I feel moved that you often work till your midnight to provide timely comments on my manuscripts and thesis. Thank you for sharing many beautiful New Zealand sceneries and sweet family pictures with me now and then, which warms me a lot when I am down and helps me keep optimistic attitude to life.

Besides, I would like to thank Prof. Sjoerd van der Zee who opened the opportunity for me to study in the Netherlands and gave me strong support to bridge my

knowledge gaps from biology and ecology education background to soil physics and ecohydrology as soon as possible. Although you are no longer with us, your unwavering dedication to academics continues to inspire me. I would like to thank Dr. Sija Scheermeijer-Stofberg who daily supervised me to start PhD and nicely helped me get used to living in the Netherlands and adapt to Dutch culture.

I would like to thank all members of the reading committee: Prof. dr. ing. Martina.G. Vijver, Prof. dr. J. C. (Koos) Biesmeijer, Dr. Han Wang, Prof. dr. J. Hans. C. Cornelissen and Dr. A. Rita de Sousa e Silva. Thank you for spending time and effort to critically read and provide constructive feedbacks on my thesis.

I thank the China Scholarship Council for the PhD funding. Thanks to Dr. Marta Benito-Garzón, Prof. Miguel A. Zavala and Eefje de Goede for your contribution to this thesis.

I also would like to thank my lovely friends and colleagues who supported me and made my PhD more enjoyable. Thanks to the supporting staff of CML, especially to Susana van den Oever, Sammy Koning, Milan Oostwouder, Pauline Offerhaus, Ludmilla van der Meer and Ingrid Boereboom for your help in the office and PhD formalities. Thanks to Yunes Verhorik for your warm welcome and goodbye every day when you were at the reception desk of cml building Thanks to my officemates Bregje Brinkmann, Janneke van Oorschot, Henrik Barmentlo, Lingxing Xu, Carlos Siguenza Sanchez and Glenn Aguilar Hernandez for your company and the nice tea and coffee breaks we had together. Thanks to triple-E committee and PhD committee: Franco Donati, Hauke Ward, Brenda Miranda Xicotencatl, Dirk-Jan Kok, Glenn Aguilar Hernandez, Sander van Nielen and Xiaoyang Zhong: I appreciated the time to work with you and learn from you.

Many thanks to my yoga buddies: Bregje Brinkmann, Amie Corbin and Dirk-Jan Kok. I couldn't enjoy more with you guys for our yoga and chatting sessions both physically and online and the time we spent together for soups and hotpots. Lots of thanks to my dear Chinese friends Di Dong, Juan Wu, Qi Yu, Deyi Wang, Chenguang Gao, Xiaoyang Zhong, Yi Jin, Zhongxiao Sun, Chen Tang, Beilun Zhao, Qi Chen, Feibo Duan, Kaixuan Pan, Weilin Huang, Chunbo Zhang, Wen Wen, Zhenyang Chen, Xining Yang, Jinhui Zhou, Yanan Liang, Feng Lin, Liangcheng Ye, Yujia Zhai, Yupeng He, Zhuoyi Luo, Ruochen Ouyang and everyone else for sharing nice food, playing pingpang and tennis, cycling, travelling, studying online together during pandemic and other fun things we did together in Leiden. Thanks to Yueling Qi, Miao Yu, Fanrong Meng, Hao Chen, Yu Peng, Xiaomeng Yang,

Lingtong Gai, Celia Bento, Demie Moore, Prof. Violette Geissen, Prof. Hongming Zhang and Prof. Shaoliang Zhang for your kind support when I was struggling and the fun time that we spent in Wageningen.

Last but not the least, I would like to express my deepest gratitude to my parents for your unconditional love and attentive care. Thanks to my aunts and cousins for your strong support. I love you all!

Jianhong
