Characterization of age-associated immunity in atherosclerosis

Proefschrift

ter verkrijging van
de graad van doctor aan de Universiteit Leiden,
op gezag van rector magnificus prof.dr.ir. H. Bijl,
volgens besluit van het college voor promoties
te verdedigen op donderdag 12 september 2024
klokke 14.30 uur

door

Virginia Smit
geboren te Beverwijk, Nederland
in 1995

Promotores

Dr. A.C. Foks
Prof. dr. J. Kuiper
Prof. dr. I. Bot

Promotiecommissie

Prof. dr. H. Irth	
Prof. dr. E.C.M. de Lange	
Prof. dr. M.P.J. de Winther	Amsterdam UMC
Prof. dr. C.J. Binder	Medical University of Vienna
Dr. M. Westerterp	UMC Groningen

The research described in this thesis was performed at the division BioTherapeutics, Leiden Academic Centre for Drug Research (LACDR), Leiden University (Leiden, The Netherlands). The research described in this thesis was supported by a grant from the Dutch Heart Foundation (DHF 2018T051). The publication of the thesis was made possible by the Dutch Heart Foundation. Financial support by the Dutch Heart Foundation for the publication of this thesis is gratefully acknowledged.

TABLE OF CONTENTS

Chapter 1	General introduction	p. 7
Chapter 2	CVD risk factors: the effects of ageing and smoking on the immune system, an observational clinical study	p. 49
Chapter 3	Single-cell profiling reveals age-associated immunity in atherosclerosis	p. 81
Chapter 4	Sexual dimorphism in atherosclerotic plaques of aged <i>Ldlr</i> ^{-/-} mice	p. 135
Chapter 5	Age-associated CD21 ^{low} B cells aggravate murine atherosclerosis and are associated with coronary events in humans	p. 177
Chapter 6	Aging promotes mast cell activation and antigen-presenting capacity in atherosclerosis	p. 225
Chapter 7	General discussion	p. 249
Appendix	Nederlandse samenvatting	p. 271
	Scientific publications	p. 290
	Curriculum vitae	p. 291
	PhD portfolio	p. 292
