Staphylococcus aureus colonization and infection

Optimizing MRSA decolonization and addressing challenges
in *S. aureus* bacteremia management

Proefschrift

ter verkrijging van
de graad van doctor aan de Universiteit Leiden,
op gezag van rector magnificus prof.dr.ir. H. Bijl,
volgens besluit van het college voor promoties
te verdedigen op donderdag 19 september 2024
klokke 16.00 uur

door

Annette Claire Westgeest

Promotores:

Prof. dr. M.G.J. de Boer

Prof. dr. L.G. Visser

Copromotores:

Dr. M.M.C. Lambregts

Dr. E.F. Schippers

Promotiecommissie:

Table of contents

1	Introduction and outline of the thesis	9
Part I	Optimization of MRSA decolonization	20
2	Exploring the barriers in the uptake of the Dutch MRSA 'search and destroy' policy using the cascade of care approach	22
3	Eradication of community-onset MRSA carriage: a narrative review	40
4	Complicated carriage with methicillin-resistant <i>Staphylococcus aureus</i> : evaluation of the effectiveness of decolonization regimens advised in the Dutch national guideline	62
5	Genetic determinants in MRSA carriage and their association with decolonization outcome	80
Part II	Challenges in <i>S. aureus</i> bacteremia management	108
6	Global differences in the management of <i>Staphylococcus aureus</i> bacteremia: no international standard of care	110
7	Acute kidney injury in <i>Staphylococcus aureus</i> bacteremia	142
8	Persistent MRSA bacteremia: host, pathogen and treatment	156
9	The association of female sex with management and mortality in patients with <i>Staphylococcus aureus</i> bacteremia	190
10	Female sex and mortality in patients with <i>Staphylococcus aureus</i> bacteremia: a systematic review and meta-analysis	212
11	Summary and general discussion	248
	Nederlandse samenvatting
