Efficient Constraint Multi-Objective Optimization with Applications in Ship Design

Proefschrift

ter verkrijging van
de graad van doctor aan de Universiteit Leiden,
op gezag van rector magnificus prof.dr.ir. H. Bijl,
volgens besluit van het college voor promoties
te verdedigen op dinsdag 8 oktober 2024

This dissertation was made possible through the support of C-Job Naval Architects which provided me with a full-time research and development position, thereby facilitating my research and studies as a guest PhD candidate at the Leiden Institute Of Advanced Computer Science, Leiden University. This arrangement was essential in enabling the completion of my doctoral studies without grant funding.
