Pumping new life into preclinical pharmacokinetics: exploring the pharmacokinetic application of ex vivo organ perfusion

Stevens, L.J.

ISBN: 978-94-92741-92-9

Design: Kira van Landschoot, vanKira.nl/phd
Lay-out: Tiny Wouters
Printed by: Drukkerij Walters bv

The research described in this thesis was performed at Leids University medical center (LUMC) and The Netherlands organization for applied research (TNO)

Publication of this thesis was financially supported by: XVIVO, Willy van Heumen fonds, Chiesi, Metabolic Health Research department of TNO and LUMC transplantatie centrum.

Pumping new life into preclinical pharmacokinetics; exploring the pharmacokinetic application of ex vivo organ perfusion

Proefschrift

ter verkrijging van
de graad van doctor aan de Universiteit Leiden,
op gezag van rector magnificus prof.dr.ir. H. Bijl,
volgens besluit van het college voor promoties
te verdedigen op dinsdag 29 oktober 2024
klokke 14.30 uur

door

Lida Joanne Stevens

geboren te Twello
in 1992

PROMOTOREN

Prof. dr. I.P.J. Alwayn
Prof. dr. C.A.J. Knibbe

CO-PROMOTOR

Dr. E. van de Steeg	TNO

LEDEN PROMOTIECOMMISSIE

Dr. M.A. Engelse	
Prof. dr. T. van Gelder	
Prof. dr. S.F.J. van de Graaf	Amsterdam University Medical Center
Prof. dr. R. Masereeuw	Utrecht University
Prof. dr. F.G.M. Russel	Radboud University Medical Center

Table of contents

Part I	**Exploring pharmacokinetics through ex vivo models**	**7**
Chapter 1	General introduction, scope and outline of the investigation	9
Chapter 2	Towards human ex vivo organ perfusion models to elucidate drug pharmacokinetics in health and disease	27
Part II	**The liver perfusion model to study drug pharmacokinetics processes and endogenous substrate handling**	**57**
Chapter 3	Evaluation of normothermic machine perfusion of porcine livers as a novel preclinical model to predict biliary clearance and transporter-mediated drug-drug interactions using statins	59
Chapter 4	Novel explanted human liver model to assess hepatic extraction, biliary excretion and transporter function	91
Chapter 5	Unraveling and enhancing the dynamics of hepatic bile acid and cholesterol metabolism during ex vivo normothermic machine perfusion; a path to improved liver function through conjugated bile acid infusion	117
Part III	**Unraveling pharmacokinetics through multi-organ perfusion**	**145**
Chapter 6	Ex vivo Gut-Hepato-Biliary organ perfusion model to characterize oral absorption, gut-wall metabolism, pre-systemic hepatic metabolism and biliary excretion; application to midazolam	147
Part IV	**Summary, future perspectives and conclusions**	**181**
Chapter 7	Summary, future perspectives and conclusions	183
Addendum	Nederlandse samenvatting	215
	Curriculum Vitae	223
	List of publications	225
	Dankwoord	227
