# **Chemical biology studies on retaining exo- $\beta$ -glucosidases**

Proefschrift

ter verkrijging van  
de graad van doctor aan de Universiteit Leiden,  
op gezag van rector magnificus prof.dr.ir. H. Bijl,  
volgens besluit van het college voor promoties  
te verdedigen op woensdag 6 november 2024  
klokke 11:30 uur

door

Qin Su  
geboren te Laibin, China  
in 1993

**Promotores**

Prof. dr. J. M. F. G. Aerts

Prof. dr. H. S. Overkleeft

**Co-promotor**

Dr. R. G. Boot

**Promotiecommissie**

Prof. dr. M. Ubbink

Prof. dr. M. van der Stelt

Prof. dr. L. P. W. J. van den Heuvel (Radboud University Medical Center)

Prof. dr. S. I. van Kasteren

Dr. T. Wennekes (Utrecht University)

Dr. M. E. Artola Perez de Azanza

## Table of Contents

|                                                                                                       |            |
|-------------------------------------------------------------------------------------------------------|------------|
| <b>Chapter 1</b>                                                                                      | <b>1</b>   |
| General introduction                                                                                  |            |
| <b>Chapter 2</b>                                                                                      | <b>15</b>  |
| Xylose-configured cyclophellitols as selective inhibitors for glucocerebrosidase                      |            |
| <b>Chapter 3</b>                                                                                      | <b>41</b>  |
| Selective labelling of GBA2 in cells with fluorescent $\beta$ -D-arabinofuranosyl cyclitol aziridines |            |
| <b>Chapter 4</b>                                                                                      | <b>73</b>  |
| Reactivity of cytosolic retaining $\beta$ -glucosidase towards retaining glycosidase ABPs             |            |
| <b>Chapter 5</b>                                                                                      | <b>91</b>  |
| Characterization of <i>C. elegans</i> retaining $\beta$ -glucosidases                                 |            |
| <b>Chapter 6</b>                                                                                      | <b>115</b> |
| Expression and analysis of <i>Nicotiana tabacum</i> $\beta$ -glucosidase B56 in mammalian cells       |            |
| <b>Chapter 7</b>                                                                                      | <b>135</b> |
| Summary and future prospects                                                                          |            |
