Engaging with New Knowledge in Low Countries' Chronicles (1500-1850)

Proefschrift

ter verkrijging van
de graad van doctor aan de Universiteit Leiden,
op gezag van rector magnificus prof. dr. ir. H. Bijl,
volgens besluit van het college voor promoties
te verdedigen op woensdag 27 november 2024
klokke 16.00 uur

door

Theodorus Martinus Adrianus Maria Dekker

geboren te Bovenkarspel

op 26 december 1992

Promotor

Prof. dr. J.S. Pollmann

Copromotores

Dr. H.M.E.P. Kuijpers (Vrije Universiteit Amsterdam)

Dr. mr. C.M. Lenarduzzi

Promotiecommissie

Prof. dr. M.P.A. de Baar

Prof. dr. C.A. Davids (Vrije Universiteit Amsterdam)

Prof. dr. ir. F.J. Dijksterhuis (Vrije Universiteit Amsterdam & Universiteit Twente)

Dr. C.V. Weeda

Het onderzoek voor dit proefschrift werd uitgevoerd binnen het project *Chronicling Novelty. New Knowledge in the Netherlands, 1500-1850* en werd gefinancierd door de Nederlandse Organisatie voor Wetenschappelijk Onderzoek (NWO).

Contents

List of Figures

Figure 1.	Geographical distribution of chronicles.	26
Figure 2.	Distribution of chronicles and volumes in periods of twenty-five years.	27
Figure 3.	Distribution of chronicles from the Northern and Southern Netherlands in periods of twenty-five years.	29
Figure 4.	Distribution of chronicles according to town size, region and period of writing.	30
Figure 5.	Denomination of the chroniclers in the Northern and Southern Netherlands per fifty years.	31
Figure 6.	Retrospective and contemporary written words in the chronicles per year.	33
Figure 7.	Number of chroniclers writing on dearth per year (1500-1850).	46
Figure 8.	The weekly price of rye in stivers per meuken as recorded by Justus Billet from 1661-66.	60
Figure 9.	'Presaise teecken en van aflach der Graenen'.	62
Figure 10.	Number of meteorological phenomena per year, in the corpus (1500-1860)	85
Figure 11.	Comet in the Months of February and March 1744, hand-coloured engraving, included in the chronicle of Albert Pietersz. Louwen.	87
Figure 12.	A list with comets from the years 827 until 1558 in the chronicle of L.F. Cattenbelt.	90
Figure 13.	Temperature measurements copied by Joachim Bontius de Waal in his chronicle from the Oprechte Haerlemsche Courant, 16-01-1740.	104
Figure 14.	Number of chroniclers reporting on an epidemic per year.	127
Figure 15.	The year 1496 as represented as written, Roman and Arabic numeral in Treckpoel's chronicle.	167
Figure 16.	The use of Roman and Arabic numerals per chronicler between 1500 and 1650.	168
Figure 17.	The Arabic numeral '4' and the Roman numerals 'vi' and 'viii' in Van Hernighem's chronicle.	172
Figure 18.	27 Den xxvij Junij Anno 1568 & 28 Den xxviii Junij Anno 1568 in the chronicle of Jan van Wesenbeke.	173
Figure 19.	Typus arithmeticae, an allegorical woodcut by Gregor Reisch in: Margarita philosophica (1503).	175
Figure 20.	Positional Roman numerals in Claes Baerentsz.'s chronicle.	176

Figure 21.	Type of numerals used in the chronicles for prices and measurements.	178
Figure 22.	Relative frequency of Hindu-Arabic numerals per author per period of 30 years (1500-1830).	183
Figure 23.	List with the number of deaths per month in the chronicle of Pieter van Godewijck.	186
Figure 24.	Population figures Mechelen 1773 in the chronicle of J.J. de Munck.	188
Figure 25.	Population figures Mechelen 1773 in the chronicle of H.D. van den Nieuwenhuysen.	189
Figure 26.	Population figures Mechelen 1773 in the Wekelyks bericht voor de stad ende provincie van Mechelen.	190
Figure 27.	Number of baptisms and deaths in the chronicle of Van der Vinne. The list continues on the next page.	191
Figure 28.	Population figures from 1747-66 in the chronicle of Jan Kluit.	192
Figure 29.	Number of cows that died from rinderpest per farmer in the chronicle of Lustigh.	195
Figure 30.	A list on the health conditions of cattle in the chronicle of Albert Pietersz. Louwen.	197

List of Tables

Table 1.	Periods of dearth in the early modern period.	44
Table 2.	Most frequent meteorological phenomena in the chronicles, 1500-1860.	83
Table 3.	Most frequent epidemics in the chronicles, 1500-1860.	125
Table 4.	Positional Roman numerals in Boonen's chronicle.	176
