New insights in the treatment of femoral neck fractures

Proefschrift

ter verkrijging van
de graad van doctor aan de Universiteit Leiden,
op gezag van rector magnificus prof.dr.ir. H. Bijl,
volgens besluit van het college voor promoties
te verdedigen op woensdag 11 december 2024
klokke 16:00 uur

door

Jorn Heine Kalsbeek
geboren te Heerenveen
in 1990

Promotor:

Prof. Dr. I.B. Schipper

Copromotores:

Dr. A.D.P. van Walsum†

Dr. W.H. Roerdink

Promotiecommissie:

Prof. Dr. R.G.H.H. Nelissen

Prof. Dr. M.H.J. Verhofstad

Dr. D. van Embden, Erasmus MC Rotterdam

Prof. Dr. Ir. J. Harlaar, Amsterdam UMC

In herinnering aan Ariaan van Walsum

TABLE OF CONTENTS

Chapter 1	Introduction and outline of this thesis	9
Part I: Identifying factors that influence outcome of treatment of femoral neck fractures		
Chapter 2	What makes fixation of femoral neck fractures fail? A systematic review and meta-analysis of risk factors.	21
Chapter 3	More than 20 degrees posterior tilt of the femoral head in undisplaced femoral neck fractures results in a four times higher risk of treatment failure.	45
Chapter 4	Validation of two methods to measure posterior tilt in femoral neck fractures.	61
Part II: Improving the treatment of femoral neck fracture surgery		
Chapter 5	Displaced femoral neck fractures in patients 60 years of age or younger: results of internal fixation with the dynamic locking blade plate	73
Chapter 6	The Dynamic Locking Blade Plate: Seven-year follow-up results of 389 hip fracture patients	89
Chapter 7	Study protocol for the DEFENDD trial: an RCT on the Dynamic Locking Blade Plate versus the Dynamic Hip Screw for displaced femoral neck fractures in patients 65 years and younger	105
Part III: General discussion, summaries and appendices		
Chapter 8	Discussion, clinical implementations and future perspectives	119
Chapter 9	Summary	135
Chapter 10	Nederlandse Samenvatting	141
Chapter 11	Appendices	149
	List of publications	151
	Curriculum Vitae	152
	Dankwoord	153
