# Acknowledgements

Completing this Ph.D. has been a truly transformative experience, and I am deeply grateful for the support and encouragement I received throughout this journey. This dissertation would not have been possible without the guidance, encouragement, and assistance of many individuals and institutions.

First and foremost, I am extremely grateful to my supervisors Peter Grünwald and Alexander Ly, whose expertise, support, and insight guided me through every stage of this work. I am deeply grateful to Peter for his patient guidance, which has significantly expanded my knowledge, especially in the areas of statistics and information theory. I also appreciate his support in helping me improve my English and his kind care during the Covid-19 pandemic, which was a lonely two-year period after I had arrived in the Netherlands. I am thankful to Alexander for consistently offering insightful scientific discussions and valuable suggestions for my scientific writing.

I would also like to thank my committee members, Prof.dr. Thorsten Dickhaus, Dr. Zhimei Ren, Dr. Nick Koning, Prof.dr.ir. Gianne Derks and Prof.dr. Marta Fiocco for sharing their time, support, and expertise. Their insightful suggestions and critical perspectives helped me refine my work.

My sincere appreciation also extends to my collaborators. I am especially grateful to Wouter Koolen, who introduced me to the field of optimization and taught me to approach scientific research from multiple perspectives. I would also like to thank Tyron Lardy, Long Long, Reuben Adams, Chengli Tan, and many other remarkable researchers for sharing insightful scientific discussions. I could not have embarked on my PhD journey without the financial support from the China Scholarship Council.

I had a wonderful four years at CWI, and I'm deeply grateful to everyone in the Machine Learning group who made this journey so memorable. My heartfelt thanks to Muriel Pérez, Udo Böhm, Tao Sun, Bojian Yin, Tom Sterkenburg, Sanne van den Berg, Hongye Chen, Lucy Zhang, and Aditya Gilra for our post-lunch ping-pong

sessions—they were a highlight of my days. I also want to thank CWI for providing such a comfortable office space and a supportive work environment. Special thanks to Nada Mitrovic and Duda Tepsic for their invaluable support in my research. And, of course, gratitude to the canteen staff for always serving a variety of food.

I'm equally grateful for the amazing friends I met along the way. Big thanks to Xinyu Hu, Gao Peng, Sirui Shen, Haohui Zhang, Hao Qiu, Zekun Ji, Wenjun Huang, Haitian Wang, Kaixiang Zhang, Xinyuan Wang, Tianyuan Wang, and many other wonderful people. I cherished every moment we spent playing sports, sharing dinners, and laughing together during our post-work conversations. Finally, I would like to thank my landlord, Flora Zhang, as well as my (former) flatmates—Zekai Jin, Zejing Zhu, Yiming Xu, Hikaru Takano, and Haoqing Xu in Amsterdam—for their wonderful company and the lively conversations that brought joy to my evenings.

I am deeply grateful to Prof. Limin Li for supervising me during my master's program. She introduced me to academic research, and I learned so much under her guidance. I also appreciate her warm hospitality every time I visited Xi'an. My heartfelt thanks also go to Prof. Xu Guo for inviting me to give a talk at Beijing Normal University.

I extend my gratitude to all my old friends from before my PhD journey—your companionship during that chapter of my life meant so much to me.

Lastly, and most importantly, I thank my parents and grandparents for their unwavering support. I am also profoundly thankful to my girlfriend, Qianxin Yi, who has always been by my side, offering love and encouragement, even from afar in China. Without their support and love, completing this dissertation would not have been possible.

# Curriculum Vitae

The author of this dissertation was born in 1994 in Cangzhou, Hebei Province, China. After completing three years of study at Cangzhou No.2 Senior High School (2010–2013), he pursued a bachelor’s degree in mathematics at Hebei University in Baoding, China (2013–2017). Following that, he earned a master’s degree (Outstanding Graduate) in applied statistics at Xi’an Jiaotong University under the guidance of Prof. Dr. Limin Li in Xi’an, China (2017–2020). The author then moved to the Netherlands, where he completed his PhD at Centrum Wiskunde & Informatica (CWI) in Amsterdam under the supervision of Prof. Dr. Peter Grünwald and Dr. Alexander Ly (2020–2024).
