Acknowledgments

Amidst the highs and lows of this PhD journey, one essential factor made it all possible: an extraordinary support system, shaped by both my professional and personal environments. The people and institutions mentioned in these acknowledgements were the fuel and the inspiration of this thesis.

First and foremost, I am deeply grateful to my ‘team’ of supervisors, Helen, Yvonne, and Willem. In 2020, you placed your trust in me to undertake this research, even when I struggled to trust it myself. Your guidance—sometimes close, sometimes distant—was invaluable in helping me navigate the challenges of focusing my efforts on the right priorities. The journey together was not always smooth sailing, but I knew I could always count on your support when I sought it.

Beyond my supervisors, I was privileged to be guided by some of my academic role models, whose wisdom and insight are the shoulders on which I stand. Jaroslaw Kantorowicz, this thesis would hardly be relevant without your help on quantitative text analysis. I am so thankful for your brilliant mind, kindness, and patience. Rick Lawson, what an honor it has been to teach human rights by your side. Matthieu Caron, your leadership, your warm friendship, and your unwavering trust have played an important role in my growth as an academic. I am excited to continue thinking and doing business ethics together. Dalia Palombo and Mathias Siems, your insightful feedback, our discussions on business and human rights, and your support and encouragements have been invaluable. Thank you for accepting to be part of my external evaluation committee.

This PhD began in March 2020, at the dawn of the COVID-19 pandemic, making relocating to the Netherlands more difficult than I had imagined. Eschwin, you carried me through it and believed in me. Without you, I would not have dreamt of starting a PhD in the first place, and I am eternally grateful for the impact you had on my life. In this isolating context, I quickly found solace in a community of fellow PhDs, who since became an essential part of my life. Among them, special thanks to Kimia, my partner-in-crime from day one: our endless overthinking sessions, long hours of working side by side, and your sarcastic humor made the journey not just bearable, but an exciting TV show. To my (para)nymphs, Hannah and Sabrina, I do not have enough words to express my love and gratitude. You were there through it all—the good, the bad, the ugly—picking me up from rock bottom and reminding me to dance through the chaos. You, along with Chouchou, are my Leiden family.

Leiden University, with its vibrant community of young researchers, has been an exceptional home for this research. I am especially grateful to the Empirical Legal Studies lab and its members for their invaluable support

and guidance on the empirical aspects of this dissertation. My intellectual growth was also nurtured by other inspiring communities I found within the *Netherlands Network for Human Rights Research*, *L'Observatoire de l'Ethique Publique*, and the *European University Institute*. In these organizations, I met like-minded academics and incredible humans, with whom I openly exchanged ideas and drew strength from their collective wisdom. In tough moments of frustrations thinking about social injustices, I think about the dedication of these academics, which gives me hope for the future of human rights.

The strong foundation I rely on and the ultimate support system in my life is, without a doubt, my wonderful family. Merci, papa et maman, for setting an example of living in generosity and grace for those around you. You are the reason I am a human rights passionate, everything I do is to make you proud. To my siblings and cousins—Perrine, Théophile, Emma, Étienne, Blandine, Manue, Marianne, and Pauline—you are the pillars I know will always be there, thank you for embracing my choices even when they differ from your own. Lorina and Mojen, your unconditional love is a constant source of strength—thank you for sharing this life journey with me and for being the funniest, most graceful, and loyal partners.

Looking back, I find myself deeply grateful for this PhD journey. The relentless questioning it demanded brought me closer to understanding not only my research but also myself. It taught me my limits, my strengths, and the incredible network of people I can rely on. Above all, this process led me to you, Antoine. With you, every doubt fades as everything finds meaning. I cannot wait for all that lies ahead, knowing you are by my side.
