Parvovirus B19:
Diagnosis, Distribution and Disease Associations

Proefschrift

ter verkrijging van
de graad van doctor aan de Universiteit Leiden,
op gezag van rector magnificus prof. dr. ir. H. Bijl,
volgens besluit van het college voor promoties
te verdedigen op dinsdag 11 maart 2025
klokke 16.00 uur
door

Anne Russcher

geboren te Breda

in 1983

Promotor

Prof. dr. A. C. M. Kroes

Co-promotor

Dr. A. C. T. M. Vossen

Leden promotiecommissie

Prof. dr. J. I. Rotmans

Prof. dr. L. G. Visser

Prof. dr. H. L. Zaaijer (Amsterdam Universitair Medisch Centrum, Amsterdam)

Dr. H. E. de Melker (Rijksinstituut voor Milieu en Gezondheid, Bilthoven)

TABLE OF CONTENTS

Chapter 1	General introduction	7
Chapter 2	Changing epidemiology of parvovirus B19 in the Netherlands since 1990, including its reemergence after the COVID-19 pandemic	41
Chapter 3	Extreme upsurge of parvovirus B19 resulting in severe fetal morbidity and mortality	59
Chapter 4	Diagnosis of intrauterine parvovirus B19 infection at birth – value of DNA detection in neonatal blood and dried blood spots	67
Chapter 5	Detection of parvovirus DNA in blood – viruses or DNA remnants?	83
Chapter 6	Parvovirus B19 DNA detectable in hearts of patients with cardiomyopathy, but absent or inactive in blood	99
Chapter 7	Transient parvovirus B19 DNAemia after kidney transplantation: a two-sided story	115
Chapter 8	Longitudinal monitoring of DNA viral loads in transplant patients using quantitative metagenomic next-generation sequencing	129
Chapter 9	Intra-host evolution during relapsing parvovirus B19 infection in immunocompromised patients	151
Chapter 10	General discussion	173
Addendum	Nederlandse samenvatting	188
	List of publications	194
	Curriculum vitae	197
