Towards individualizing anticoagulant therapy
understanding risk factors for thrombosis and bleeding

Eleonora Camilleri

Colophon

The work described in this thesis was performed at the Department of Clinical Epidemiology of the Leiden University Medical Center in Leiden, the Netherlands and supported by a grant of the Dutch Thrombosis Foundation (2019-01).

Financial support by the Trombostichting Nederland, Federatie van Nederlandse Trombosediensten and the Hartstichting for publication of this thesis is greatly acknowledged.

Towards individualizing anticoagulant therapy
understanding risk factors for thrombosis and bleeding

Proefschrift

ter verkrijging van
de graad van doctor aan de Universiteit Leiden,
op gezag van rector magnificus prof.dr.ir. H. Bijl,
volgens besluit van het college voor promoties
te verdedigen op donderdag 13 maart 2025
klokke 16 uur

door

Eleonora Camilleri
geboren te Firenze
in 1992

Promotor

Prof. Dr. S.C. Cannegieter

Co-promotor

Dr. N. van Rein

Dr. B.J.M. van Vlijmen

Leden promotiecommissie

Prof. Dr. O.M. Dekkers

Prof. Dr. C.M. Cobbaert

Prof. Dr. T. Hackeng (Cardiovascular Research Institute Maastricht, Maastricht, Netherlands)

Dr. V.M. Morelli (UiT – The Arctic University of Norway, Tromsø, Norway)

Table of Contents

Chapter 1	Introduction and thesis outline	7
Part I. Coagulation profiles and venous thromboembolism		
Chapter 2	Influence of rosuvastatin on apolipoproteins and coagulation factor levels: results from the START trial	21
Chapter 3	Coagulation profiles during and after anabolic androgenic steroid use: data from the HAARLEM study	45
Chapter 4	Glucocorticoids are associated with a procoagulant state and an increased risk of recurrence in patients with a recent venous thromboembolism	71
Part II. Risk of bleeding during anticoagulant therapy		
Chapter 5	Stability of vitamin K antagonist anticoagulation after COVID-19 diagnosis	95
Chapter 6	Genetic polymorphisms and major bleeding risk during Vitamin-K antagonists treatment: the BLEEDS case-cohort	117
Chapter 7	Bridging therapy and risk of major bleeding and thrombosis in continuous-flow left ventricular assist device patients: a quasi-experimental study	145
Chapter 8	Direct oral anticoagulant plasma levels at the time of elective surgery: the DALI study	167
Part III. Novel biomarkers for thrombosis and bleeding		
Chapter 9	Quantitative protein mass spectrometry for multiplex measurement of coagulation and fibrinolytic proteins toward clinical application: what, why and how?	197
Chapter 10	Plasma proteomic profiles of patients during anticoagulant treatment with vitamin K antagonists	221
Part IV. Discussion and general summary		
Chapter 11	Discussion and future perspective	259
Appendix	Nederlandse samenvatting	283
	Curriculum Vitae	291
	List of publications	295
	PhD portfolio	299
	Dankwoorden	305
