In Vitro Recapitulation of Female Germ Cell Development:
From Specification to Meiosis Initiation

Proefschrift

ter verkrijging van
de graad van doctor aan de Universiteit Leiden,
op gezag van rector magnificus prof.dr.ir. H. Bijl,
volgens besluit van het college voor promoties
te verdedigen op donderdag 20 maart 2025
klokke 13:00 uur

door

Yolanda Wenjun Chang
geboren te Lanzhou, China
in 1991

Promotors

Prof.dr. S. M. Chuva de Sousa Lopes

Prof.dr. N. Geijsen

Promotie commissie

Prof.dr. C.L. Mummery

Dr. K.Szuhai

Dr. L. Clemens-Daxinger

Prof. dr. M.E. Drukker, Leiden Academic Centre for Drug Research (LACDR), Leiden University

Prof. dr. A.M.M. van Pelt, Amsterdam UMC, Vrije Universiteit Amsterdam

“It is the nature of the idea to be communicated, written, spoken, done. The idea is like grass it craves light, likes crowds, thrives on crossbreeding, grows stronger from being stepped on.”

- **Ursula Le Guin, *The Dispossessed: An Ambiguous Utopia***

Table of contents

Chapter 1	General introduction and thesis outline	10
Chapter 2	Tissue of Origin, but Not XCI State, Influences Germ Cell Differentiation from Human Pluripotent Stem Cells	28
Chapter 3	Efficient and scalable generation of primordial germ cells in 2D culture using basement membrane extract overlay	56
Chapter 4	Ligand-receptor interactions elucidate sex-specific pathways in the trajectory from primordial germ cells to gonad during human development	93
Chapter 5	In vitro reconstitution of human female germ cell development reveals differential signaling niche requirements for PGCLCs and fetal germ cells.	132
Chapter 6	Establishment of a Feeder-Free Culture System for the Expansion and Early Maturation of Primordial Germ Cell-Like Cells (PGCLCs)	160
Chapter 7	Discussion	187
Appendices	Summary	202
	Samenvetting	204
	Acknowledgement	206
	List of Publications	207
	Curriculum Vitae	208
