Table of Contents

Chapter 1: Introduction

1.1. Background and State of the Art	16
1.2. Research Questions	17
1.3. Theoretical Framework: Pottery as an Indicator for Interactions between Communities	18
1.4. Dataset	18
1.5. Methodology	18
1.6. Structure	20

Chapter 2: Cyprus and Cilicia in the third Millennium BC

2.1. Cyprus in the third Millennium BC	24
2.1.1. Geography and Environment	24
2.1.2. History of Research	25
2.1.2.1. Archaeology in Cyprus	25
2.1.2.2. Archaeology of the Chalcolithic and the Early Bronze Age	26
2.1.3. Chronology and Periodization	27
2.1.3.1. Chronology and Periodization of Prehistoric Cyprus	27
2.1.4. The Cypriot Archaeological Record in the Late Chalcolithic and the Philia Phase	30
2.1.4.1. Site Distribution and Architecture	31
2.1.4.2. Subsistence Strategies	33
2.1.4.3. Metallurgy	33
2.1.4.4. Figurines, Symbolism, and Other Artefacts	35
2.1.4.5. Mortuary Practices	36
2.1.4.6. Social Organisation	37
2.2. Cilicia in the third Millennium BC	38
2.2.1. Geography and Environment	38
2.2.2. History of Research	40
2.2.2.1. Archaeology in Anatolia	40
2.2.2.2. Archaeology of Bronze Age Cilicia	42
2.2.3. Chronology and Periodization	42
2.2.3.1. Chronology and Periodization of Prehistoric Anatolia	42
2.2.4. The Archaeological Record in the Early Bronze Age I and II	44
2.2.4.1. Site Distribution and Architecture	45
2.2.4.2. Subsistence Strategies	47
2.2.4.3. Metallurgy	47

2.2.4.4. Anthropomorphic Figurines	48
2.2.4.5. Mortuary Practices	48
2.2.4.5. Social Organization	49
2.3. Cyprus and Anatolia ca.2900-2200 BC:	50
A Debate of Interactions	
2.3.1. Anatolia: The Anatolian Trade Network (ca. 2500-2000 BC)	50
2.3.2. History of Research: The Origins and Evolution of the Philia Debate	52
2.3.3. Bridging the Gaps: The Anatolian Trade Network in Relation to the Philia Culture	54
2.4. Concluding Summary	55
 Chapter 3: Pottery in Cyprus and Cilicia in the Third Millennium BC	
3.1. Pottery in Cyprus in the Third Millennium BC	58
3.1.1. Pottery Studies in Cyprus	58
3.1.2. Pottery in the Middle and Late Chalcolithic Periods (ca. 3600/3400-2400 BC)	61
3.1.3. Pottery in the Philia Phase (ca. 2400-2350/2250 BC)	65
3.2. Pottery in Cilicia in the Third Millennium BC	67
3.2.1. Pottery in Tarsus-Gözlükule in the EB I and II	68
3.2.1.1. The Chaff-Faced Wares	68
3.2.1.2. The Red Gritty Ware	69
3.2.1.3. The Red or Black Burnished Wares	72
3.2.1.4. Cooking Pots	74
3.2.1.5. The Light Clay Ware & the Fine Spiral Banded Ware	74
3.3. Bridging the Gaps: Connections between Cypriot and Anatolian Pottery in the third Millennium BC	77
3.3.1. Investigating Interactions within and outside Cyprus in the Third Millennium BC	77
3.3.2. Investigating Connections between Cypriot and Anatolian Pottery in the Third Millennium BC	78
3.4. Concluding Summary	80
 Chapter 4: Pottery as a Tool for Reconstructing Interactions between Communities – A Theoretical and Methodological Framework	
4.1. Connectivity in the Mediterranean and Island Archaeology	84
4.2. Studying Ancient Pottery: Style, Function, and Technology	86
4.3. The Chaîne Opératoire Approach, Pottery	88

Technology, Interactions Between Communities and Crafting as Social Practice	
4.4. Dataset and Methodologies	96
4.4.1. Dataset	96
4.4.2. Methodologies and Research Objectives	97
4.4.2.1. Morphological Study – Macroscopic analysis	97
4.4.2.2. Mineralogical and Compositional Analysis – Ceramic Thin Section Petrography	98
4.4.2.3. Chemical/Elemental Analysis – hhXRF	99
4.5. Summing up the theoretical and methodological framework	100

Chapter 5: Pottery Production in Late Chalcolithic Cyprus:

A Macroscopic Study

5.1. An Overview of the Assemblages	106
5.1.1. Western Cyprus: Chlorakas-Palloures and Kissonerga-Mosphilia	106
5.1.2. Northwestern Cyprus: Ambelikou-Agios Georghios	109
5.1.3. Central Cyprus: Politiko-Kokkinorotsos	112
5.1.4. The Wares included in this study	114
5.2. The Macroscopic Analysis	114
5.2.1. Clay Procurement and Preparation – The Macrofabrics	114
<u>Macrofabric Group 1</u> : Red/pink/orange clays with prominent red, blue and white inclusions	116
<u>Macrofabric Group 2</u> : Pink-buff clays with prominent large white inclusions along with red, blue and grey inclusions	116
<u>Macrofabric Group 3</u> : Dark brown clays with prominent black core and white inclusions	117
<u>Macrofabric Group 4</u> : Red/brown clays with prominent beige and brown inclusions	118
<u>Macrofabric Group 5</u> : Orange/brown clays with small white and grey inclusions	118
<u>Macrofabric Group 6</u> : Brown clays with coarse large inclusions	119
5.2.2. Vessel Forming Techniques	119
5.2.2.1. Pinching	120
5.2.2.2. Coiling	120
5.2.2.3. Slab-building	120
5.2.3. Surface Treatment and Decoration	120
5.2.3.1. Surface Treatment and Decoration of the Red Black Stroke-Burnished Ware (RB/B)	121
5.2.3.2. Surface Treatment and Decoration of the Spalled Ware (SW)	121

5.2.3.3. Surface Treatment and Decoration of the Late Chalcolithic Red Monochrome Ware (LChalRM)	122
5.2.3.4. Surface Treatment and Decoration of the Red Lustrous Ware (RL) and the Red Black Lustrous Ware (RBL)	122
5.2.3.5. Surface Treatment and Decoration of the Coarse Ware (CW)	123
5.2.4. Vessel Shapes	124
5.2.5. Firing	127
5.3. Concluding Summary	128

Chapter 6: Pottery Production in Late Chalcolithic Cyprus:

A Compositional and Technological Study

6.1. Ceramic Thin Section Petrography	132
6.1.1. Analytical methodology and research objectives	132
6.1.2. The Geology of Cyprus	133
6.1.3. Sampling Strategy and Overview of Samples	134
6.1.4. Petrographic examination of samples	137
<u>Fabric I</u> : Fabric with dominant presence of argillaceous inclusions	141
<u>Fabric II</u> : Sedimentary clay-based fabric with dominant argillaceous inclusions, common sandstone and few dolerite fragments	142
<u>Fabric III</u> : Fabric with dominant presence of micritic limestone and chert	143
<u>Fabric IV</u> : Fabric with dominant presence of amphiboles, feldspars, and quartz	144
<u>Fabric V</u> : Fabric with dominant presence of carbonates	145
<u>Fabric VI</u> : Fabric with dominant presence of feldspars and dolerite	146
<u>Fabric VII</u> : Fabric with dominant presence of igneous components, especially dolerite and basalt	147
<u>Outliers</u>	148
<u>Outlier S49</u> – Fabric with dominant presence of red argillaceous inclusions	148
<u>Outlier S71</u> – Fabric with dominant presence of igneous inclusions and sedimentary components	148
<u>Outlier S79</u> – Fabric with dominant presence of quartz, basalts and clinopyroxenes	149
<u>Outlier S80</u> – Fabric with dominant presence of chert and orthopyroxenes	149

6.2. The Chemical/Elemental Study of Samples – hhXRF	150
6.2.1 Analytical Methodology and Research Objectives	150
6.2.2. The Chemical/Elemental Data	151
6.3. Concluding Discussion: Integrating the Macroscopic, Petrographic, and Elemental Data	153
6.3.1. Clay Procurement and Preparation: Local Production and Exchange of Pottery between Communities	153
6.3.2. Surface Treatment and Decoration, and Vessel Shapes: People Circulating Between Communities	159
6.3.3. Vessel Forming Techniques and Firing: Long-Term Interactions – People Relocating and Living at Different Communities	161
6.4. Concluding Summary	162
 Chapter 7: Circulation of Ceramics, Pottery Technology and Extra-Insular Interactions	
7.1. Indications of Contacts between Cyprus and Anatolia up to the Philia Phase – A literature review	166
7.1.1. The Chalcolithic	166
7.1.1.1. Faience beads	167
7.1.1.2. Metal objects	167
7.1.1.3. Spurred annular pendants, earrings, and picrolite figurines	169
7.1.1.4. Pottery	169
7.1.3. The Philia Phase	170
7.2. The Tarsus-Gözlükule Assemblage – A Comparative Study to Assess Chalcolithic and Philia Connections	172
7.2.1. Cypriot Imports	172
7.2.1.1. Red-on-White (RW) Sherds	173
7.2.1.2. Philia Black Slip and Combed Ware (BSC) sherds	174
7.2.1.3. A Philia pitcher and Philia-like spout	175
7.2.2. Pottery Technology Similarities between Cypriot Pottery and the Tarsus-Gözlükule Assemblage	176
7.2.2.1. Surface treatment similarities between Tarsus and Late Chalcolithic Cypriot wares: Burnishing and relief decoration	176
7.2.2.2. Red Gritty Ware from Tarsus and Late Chalcolithic Spalled Ware from Cyprus: A possible influence	178

7.2.2.3. Philia Red Polished Ware and pottery from Tarsus: Similarities in firing, surface treatment and forming techniques	180
7.2.2.4. Cooking pots in EBA Tarsus and Philia Cooking Pots Type A	182
7.2.2.5. Red Gritty Ware, Philia Cooking Pots and Spalled Ware: a possible continuum?	186
7.3. Concluding Discussion: Consolidating Literature, Macroscopic Observations and Petrographic Data	187
7.3.1. Clay Procurement and Preparation: Local Production and Exchange of Pottery between Communities	187
7.3.2. Surface Treatment and Decoration, and Vessel Shapes: Mediated Interactions – People Circulating between Communities	188
7.3.3. Vessel Forming Techniques, Vessel Shapes, and Firing: Long-Term Interactions – People Moving and Living at Different Communities	189
7.4. Concluding Summary	190
 Chapter 8: Discussion and Conclusions	
8.1. Addressing the Research Questions	194
8.1.1. How did pottery technology in Cyprus develop during the Late Chalcolithic?	194
8.1.1.1. Clay procurement and preparation	195
8.1.1.2. Surface treatment and decoration	197
8.1.1.3. Vessel forming techniques and shapes	197
8.1.1.4. Firing	198
8.1.1.5. Summing up the evolution of pottery technology in the Late Chalcolithic: variability at a local, regional, and inter-regional level, and organization of production	198
8.1.2. To what extent were ceramics circulated and exchanged among population groups from different regions in Cyprus?	199
8.1.3. To what extent were ceramics circulated and exchanged between Cyprus and Anatolia in the early third millennium BC?	201
8.1.4. To what extent did pottery technologies and characteristics transfer from Anatolia to Cyprus and vice versa?	201

8.1.4.1. Clay procurement and preparation	202
8.1.4.2. Surface treatment and decoration	202
8.1.4.3. Vessel shapes and vessel forming techniques	202
8.1.4.4. Firing	203
8.2. Conclusions	204
8.3. Prospects for Further Research	209
