late complications.**

Proefschrift

ter verkrijging van
de graad van doctor aan de Universiteit Leiden,
op gezag van rector magnificus prof.dr.ir. H. Bijl,
volgens besluit van het college voor promoties
te verdedigen op dinsdag 3 juni 2025
klokke 16:00 uur

door

Marieke Nederend
geboren te Bodegraven
in 1993

Promotiecommissie

Promotoren:

Prof. dr. M.J. Schali

Prof. dr. M.R.M. Jongbloed

Copromotor:

Dr. A. D. Egorova

Leescommissie:

Prof. dr. N.A. Blom

Prof. dr. J.W. Roos-Hesseling

Prof. dr. A. van de Bruaene

Dr. J.M. Douwes

Universitair Ziekenhuis Leuven (UZ Leuven)

Universitair Medisch Centrum Groningen (UMCG)

Table of content

Chapter 1	General introduction and thesis outline	9
Part 1	The failing systemic right ventricle	
Chapter 2	Sacubitril/valsartan in the treatment of systemic right ventricular failure	31
Chapter 3	Potential of eHealth smart technology in optimization and monitoring of heart failure treatment in adults with systemic right ventricular failure	47
Chapter 4	Tolerability and beneficial effects of sacubitril/valsartan in systemic right ventricular failure	67
Chapter 5	Sacubitril/Valsartan is associated with improvements in quality of life in adult congenital heart disease patients with systemic right ventricular failure	89
Chapter 6a	The potential of sodium-glucose cotransporter 2 inhibitors for the treatment of systemic right ventricular failure in adults with congenital heart disease	101
Chapter 6b	The first experience with sodium-glucose cotransporter 2 inhibitor for the treatment of systemic right ventricular failure	115
Chapter 7a	Atrioventricular block necessitating chronic ventricular pacing after tricuspid valve surgery in patients with a systemic right ventricle: long-term follow-up	129
Chapter 7b	Successful hybrid cardiac resynchronization therapy in a patient with failing systemic right ventricle and significant tricuspid regurgitation in transposition of the great arteries after atrial switch procedure according to Mustard	151
Chapter 7c	Failing systemic right ventricle in a patient with dextrocardia and complex congenitally corrected transposition of the great arteries: a case report of successful transvenous cardiac resynchronization therapy	163

Part 2	Complications of the Fontan circulation	
Chapter 8a	Percutaneous closure of veno-venous collaterals in adult patients with univentricular physiology after Fontan palliation: Single centre experience and systematic review	175
Chapter 8b	Case report of the broad spectrum of late complications in an adult patient with univentricular physiology palliated by the Fontan circulation	217
Chapter 8c	Genetic variant in the BRAF gene compatible with Noonan spectrum disorders in an adult Fontan patient with refractory protein losing enteropathy: a follow-up report	237
Chapter 8d	Transcatheter aortic valve-in-valve implantation in right ventricle-aorta conduit in an adult patient with Fontan circulation	247
Chapter 9	Cardiac autonomic function and atrial arrhythmias in adult patients with a univentricular physiology after Fontan palliation	259
Chapter 10	Summary and future perspectives	281
Chapter 11	Nederlandse samenvatting	291
Appendix	List of publications	305
	Dankwoord	307
	Curriculum vitae	309
